Time of uninterrupted working in the

Lighting Mode: 4 hours

Time of uninterrupted working in the

ULTRASONIC mode: 1.5 hours

TIP: When the LED indicator goes red——Battery is discharged. For battery protection the device turns off in 5 seconds automatically.

Frequently Asked Questions

Q1: Does Ultrasonic Affect Other Animals?

A1: It's not impacted other animals as long as they are out of 25 feet range. Household pets like cats and birds are not affected.

Q2: Will this hurt my other dogs who aren't reactive barkers?

A2: While it will not harm your other pets, this is a training device, so separating your already trained dogs from your reactive barker is advisable to avoid confusion. 25 feet is all that's required.

Q3: Why is Hawpet most effective with dogs age 6 months to 8 years?

A3: Age-related hearing loss makes it challenging for dogs over age 8 to hear and react. Before 6 months, a puppy's auditory system is not developed enough to fully understand the impact, so we err on the side of caution and recommend you only use it at 6 months or older.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.
