- Verbinden Sie das kabellose Ladegerät und das PD 3.0-Ladegerät mit dem USB-C®-Anschluss.
- Wir empfehlen, für das kabellose Ladegerät das j5create PD 3.0-Ladegerät zu verwenden. Nicht autorisierte Ladegeräte können das kabellose Ladegerät beschädigen oder zu Fehlfunktionen führen.

Schritt 2
- Legen Sie Ihr Handy oder Ihre kabellosen Kopfhörer in das kabellose Ladegerät ein. Platzieren Sie Ihr mobiles Gerät in der Mitte des kabellosen Ladepads, um die besten Ladeergebnisse zu erzielen.

Installation

Steg 1
- Ansluta USB-C®-kabeln till den trådlösa laddaren och till PD 3.0-laddaren.
- Vi rekommenderar att du använder j5create PD 3.0-laddaren med den trådlösa laddaren. Obehörliga laddare kan orsaka skador eller leda till att den trådlösa laddaren inte fungerar som den ska.

Steg 2
- Placera telefonen eller de trådlösa hörlurarna på den trådlösa laddaren. För bästa laddningsresultat placerar du din mobila enhet i mitten av den trådlösa laddningsplattan.

Felaktig placering kan leda till att den mobila enheten inte laddas korrekt.

Vi rekommenderar att du använder stativet för trådlös laddning tillsammans med en MagSafe®-kompatibel iPhone® (12-serien eller senare) och ett fodral för bästa möjliga användarupplevelse.

Metallföremål som kort och nycklar stör laddningen. Innan du placerar din mobila enhet på den trådlösa laddaren ska du ta bort skyddsfodralet om den har metallkomponenter.

Laddningstiden varierar beroende på miljöfaktorer och de faktiska resultaten kan variera.

Avancerat multiskydd

- OCP (överströmsskydd)
- SCP (kortslutningsskydd)
- OTP (övertemperaturskydd)

Systemkrav

- Mobiltelefoner måste stödja Qi™-standarden för trådlös laddning och MagSafe® för att kunna använda den magnetiska laddningsskivan.

■ Installation

Trin 1

・Slut USB-C®-kablet til den trådløse oplader og til opladeren med PD 3.0.
・Vi anbefaler, at bruge j5create opladeren med PD 3.0 til den trådløse oplader. Uautoriserede opladere kan beskadige enheden og kan gøre, at den trådløse oplader ikke virker ordentligt.

Trin 2

・Placer din telefon eller trådløse hovedtelefoner på den trådløse oplader. For at opnå den bedste opladningseffekt, skal mobilenheden placeres midt på den trådløse opladningsplade.

Hvis mobilenheden placeres forkert, oplades den muligvis ikke ordentligt.

Det anbefales at bruge det trådløse opladningsstativ med en MagSafe®-kompatibel iPhone® (12-serien eller nyere) og et etui for, at få den bedst mulige brugeroplevelse.

Metalgenstande såsom kort og nøgler forstyrrer opladningen. Før du placerer din mobilenhed på den trådløse oplader, skal du fjerne beskyttelsesetuiet, hvis der er metaldele på det.

Opladningstiden varierer afhængigt af miljøfaktorer, og de faktiske resultater kan variere.

■ Avanceret multibeskyttelse

・OCP (beskyttelse mod overstrøm)
・SCP (beskyttelse mod kortslutning)

■ Installasjon

Trinn 1

・Koble USB-C®-kabelen til den trådløse laderen og til PD 3.0-laderen.
・Vi anbefaler at du bruker j5create PD 3.0-laderen med den trådløse laderen. Uautoriserte ladere kan forårsake skade eller føre til at den trådløse laderen ikke fungerer.

Trinn 2

・Legg telefonen eller de trådløse ørepluggene på den trådløse laderen. Plasser mobilenheten i midten av den trådløse ladeputen for best mulig laderesultat.

Feil plassering kan føre til at mobilenheten ikke lades ordentlig.

Det anbefales å bruke det trådløse ladestativet med en MagSafe®-kompatibel iPhone® (12-serien eller nyere) og etui for den beste brukeropplevelsen.

Metallgjenstander som kort og nøkler vil forstyrre ladingen. Før du legger mobilenheten på den trådløse laderen, må du ta av beskyttelsesdekselet hvis det har metallkomponenter.

Ladetiden varierer avhengig av miljøfaktorer, og faktiske resultater kan variere.

■ Asennus

Vaihe 1

・Liitä USB-C®-kaapeli langattomaan laturiin ja PD 3.0 -laturiin.
・j5create PD 3.0 laturia on suositeltavaa käyttää langattoman laturin kanssa. Valtuuttamattomat laturit voivat aiheuttaa vahinkoa tai langattoman laturin toimintahäiriön.

Vaihe 2

・Aseta puhelin tai langattomat korvanapit langattoman laturin päälle. Saadaksesi parhaat lataustulokset, sijoita mobiililaite langattoman latauslevyn keskelle.

Väärä sijoittaminen voi saada aikaan, ettei mobiililaite lataudu oikein.

On suositeltavaa käyttää langatonta latauslelinettä MagSafe®-yhteensopivalla iPhone®:lla (12-sarja tai uudempi) ja kotelolla parhaan käyttäjäkokemuksen saamiseksi.

Metalliesineet, kuten kortit ja avaimet häiritsevät latausta. Ennen kuin asetat mobiililaitteen langattoman laturin päälle, poista suojakotelo, jos siinä on metalliosia.

Latausaika vaihtelee ympäristötekijöiden mukaan ja todelliset tulokset voivat olla erilaisia.

■ Edistynyt monisuojaus

・OVP (Ylijännitesuojaus)
・OCP (Ylivirtasuojaus)
・SCP (Oikosulkusuojaus)
・OTP (Ylilämpötilasuojaus)

■ Järjestelmävaatimukset

・Matkapuhelinten on tuettava Qi™-langatonta latausstandardia ja MagSafe®-laturia magneettisen latauslevyn käyttämiseksi.
・Korvanappien on tuettava Qi™-langatonta latausstandardia magneettisen latauslevyn käyttämiseksi.

■ Telepítés

1. lépés

・Csatlakoztassa az USB-C® kábelt a vezeték nélküli töltőhöz és a PD 3.0 töltőhöz.
・A j5create PD 3.0 töltő használatát javasoljuk a vezeték nélküli töltővel együtt. A nem engedélyezett töltők kárt okozhatnak, vagy a vezeték nélküli töltő meghibásodását okozhatják.

2. lépés

・Helyezze a telefont vagy a vezeték nélküli fülhallgatót a vezeték nélküli töltőre. A legjobb töltési eredmények elérése érdekében helyezze mobilkészülékét a vezeték nélküli töltőfelület közepére.

A nem megfelelő elhelyezés miatt a mobilkészülék nem töltődik fel megfelelően.

A vezeték nélküli töltőállványt MagSafe®-kompatibilis iPhone® (12-es sorozatú vagy újabb) készülékkel és tokkal ajánlott használni a legjobb felhasználói élmény érdekében.

A fémtárgyak, például kártyák és kulcsok zavarják a töltést. Mielőtt a vezeték nélküli töltőre helyezné a mobilkészüléket, kérjük, távolítsa el a védőburkolatot, ha az fémalkatrészekkel rendelkezik.

A töltési idő a környezeti tényezőktől függően eltér, és a tényleges eredmények eltérhetnek.

■ Fejlett multi védelem

・OVP (túlfeszültség elleni védelem)
・OCP (túláram elleni védelem)
・SCP (rövidzárlat elleni védelem)
・OTP (túlmelegedés elleni védelem)

■ Rendszerkövetelmények

・A mágneses töltőlemez használatához a mobiltelefonoknak támogatniuk kell a Qi™ vezeték nélküli töltési szabványt és a MagSafe® szabványt.
・A vezeték nélküli töltőlap használatához a fülhallgatóknak a Qi™ vezeték nélküli töltési szabványnak kell megfelelniük.
