05 BASIC SPECIFICATIONS

Model number	PFD05 (Minimalpro)	Rated voltage	220V~50 Hz
Product name	FDG5	Wireless connection	Bluetooth
Product size	360*270*360mm	Rated power	30±10W
Scope of application	Lid-on-bowl feeding type (Stainless steel bowl)	Rated current	1A@
Product weight	4.8kg (Stainless steel)		

06 A MESSAGE TO OUR VALUED CUSTOMERS

Thank you for choosing PETKIT! We are delighted to have the honour of serving your pet and your family.

- Please carefully read the User Manual before using the product. By setting up and using the product, you are deemed to have read and understand the contents of the User Manual and agree to be bound by the terms and conditions herein.
- Please keep the User Manual properly for future reference. Refer to the User Manual for assistance and troubleshooting.
- We are committed to continuously improving our products and services. Your feedback is valuable to us.

07 USER SAFETY GUIDE

- Ensure the power supply voltage matches the product's specified voltage to avoid damage to the equipment and potential electrical hazards.
- Place the equipment on a stable, flat surface in a dry environment. Do not use in wet or humid conditions.
- Do not place the equipment near heat sources or in direct sunlight to prevent overheating and damage.
- Do not touch the hot air outlet. Hot air flows from the equipment to sterilize/dry the pet snack and feeding utensils. Keep your hands and other body parts away from the hot air outlet.
- Please observe the requirements of local laws and regulations, and do not place it on a lit stove or near open flames to avoid fire hazards.
- Do not disassemble or modify the equipment.
- Do not use it outside the scope of intended use.
- Do not use it in environments with flammable or explosive gases, such as gasoline, ether, or other volatile substances, to avoid explosion risks. Do not use it in environments with high concentrations of oil, salt, or corrosive substances (such as near the kitchen or seaside areas) to prevent damage to the equipment and ensure its safe operation.
- Do not place the equipment near water sources or in environments with high humidity to prevent electrical hazards and equipment damage.
- Do not place the equipment near magnetic fields to avoid interference with its electronic components.
- Do not place the equipment near pacemakers or other medical devices to prevent interference with medical equipment.
- Do not place the equipment near flammable materials (such as paper, fabric, or plastic) to prevent fire hazards.
- Do not place the equipment near children or pets to prevent accidental ingestion or injury. Keep the equipment out of reach of children and pets.
- Do not use the equipment for purposes other than pet snack sterilization and drying. Do not use it for other purposes.
- Do not place the equipment near food preparation areas to avoid contamination of food.
- Do not place the equipment near medical devices to prevent interference with medical equipment.
- Do not place the equipment near electronic devices to prevent interference with their operation.
- Do not place the equipment near children's toys to prevent accidental ingestion or injury.
- Do not place the equipment near cleaning products to prevent chemical contamination.
- Do not place the equipment near pet food storage containers to prevent contamination of pet food.
- Do not place the equipment near pet bedding to prevent fire hazards.
- Do not place the equipment near curtains or other flammable materials to prevent fire hazards.
- Do not place the equipment near pet toilets to prevent contamination and odor.
- Do not place the equipment near pet grooming areas to prevent contamination of pet hair.
- Do not place the equipment near pet feeding areas to prevent contamination of pet food.
- Do not place the equipment near pet water bowls to prevent contamination of water.
- Do not place the equipment near pet toys to prevent contamination of toys.
- Do not place the equipment near pet beds to prevent contamination of bedding.
- Do not place the equipment near pet grooming tools to prevent contamination of tools.
- Do not place the equipment near pet medical supplies to prevent contamination of medical supplies.
- Do not place the equipment near pet clothing to prevent contamination of clothing
