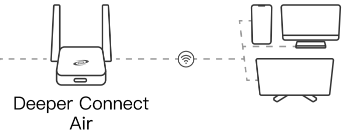
w it works

eless Relay Mode



Ensure there’s a stable network connection

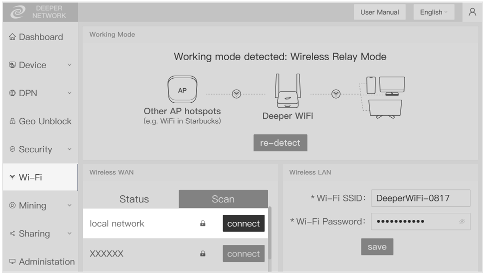
Plug in the device and turn it on (Please power the device using a USB 3.0 interface)

Connect to the device’s Wi–Fi after the indicator light starts blinking red

Enter the AtomOS dashboard and connect to an available local Wi–Fi

Step by step setup

4. Connect the Deeper Connect Air using the “scan Wi–Fi” button under the wireless WAN setting. Select a local network to connect to and enter the Wi–Fi password in the pop–up window. Connection may take up to 60 seconds.



Working mode detected: Wireless Relay Mode

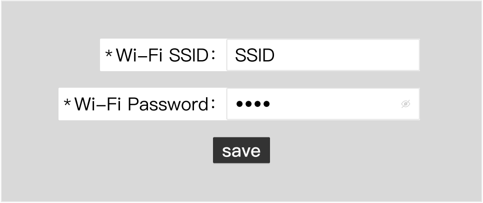
local network

XXXXXX

* Wi–Fi SSID: DeeperWiFi–0817

* Wi–Fi Password: ●●●●●●●●●●●●

5. To reset the Wi–Fi adapter’s SSID and password, enter new Wi–Fi SSID in the Wireless LAN setting and click “save”. Reboot after successfully changing the Wi–Fi SSID. When the indicator light is solid blue, it means the network is connected. Enjoy your Deeper Connect Air!



*Wi–Fi SSID: SSID

*Wi–Fi Password: ●●●●

Step by step setup

1. Power on the Deeper Connect Air by plugging in the Type–C port to a power source. (Please power the device using a USB 3.0 interface) Indicator light changes from blue blinking to red blinking, indicating it is ready to connect.

2. Connect to the Wi–Fi network: “DeeperWiFi–xxxx" Enter the password: “ilovedeeper" to connect your device to the Deeper Connect Air.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection againstharmful interference in a residential installation. This equipment generates, uses and can radiateradio frequency energy and, if not installed and used in accordance with the instructions, maycause harmful interference to radio communications. However, there is no guarantee thatinterference will not occur in a particular installation. If this equipment does cause harmfulinterference to radio or television reception, which can be determined by turning the equipmentoff and on, the user is encouraged to try to correct the interference by one or more of thefollowing measures:

1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with
Rules. Operation is subject
conditions:

1. This device may not caus
and
2. this device must accept a
received, including interfe
undesired operation.

This equipment complies
exposure limits set forth
environment. This equipmen
and operated with minimum
the radiator and your body.

This device meets the exemption from the routine evaluation limits in section 2.5 of RSS 102 and compliance with RSS 102 RF exposure, users can obtain Canadian information on RF exposure and compliance.

cet appareil est conforme à l'exemption des limites d'évaluation courante dans la section 2.5 du cnr – 102 et conformité avec rss 102 de l'exposition aux rf, les utilisateurs peuvent obtenir des données canadiennes sur l'exposition aux champs rf et la conformité.

This equipment complies with Canada radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance 0cm between the radiator & your body.

Cet équipement est conforme Canada limites d'exposition aux radiations dans un environnement non contrôlé.

Cet équipement doit être installé et utilisé avec une distance minimale de 0 cm entre le radiateur et votre corps.

The device for operation in the band 5150–5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems.

L'appareil destiné à fonctionner dans la bande 5150-5250 MHz est uniquement destiné à une utilisation en intérieur afin de réduire le potentiel d'interférences nuisibles aux systèmes mobiles par satellite cocanaux.

This radio transmitter has been approved by Industry Canada to operate with the antenna types listed with the maximum permissible gain indicated. Antenna types not included in this list, having again greater than the maximum gain indicated for that type, are strictly prohibited for use with this device.

Le présent émetteur radio a étéapprouvé par Industrie Canada pour fonctionner avec les types d'antenne énumérés ci-dessous et ayant un gain admissible maximal. Les types d'antenne non inclus dans cette liste, et dont le gain est supérieur au gain maximal indiqué, sont strictement interdits pour l'exploitation de l'émetteur.
