7. Troubleshooting

The watch cannot be connected to the server when it is turned on for the first time. Please check:

1)Is the SIM card inside the watch is 4g?

2) Whether the SIM card in the watch is activated for data traffic.

3) Whether the server parameters are IP and APN, and the IMEI is correct.It must be ensured that the IMEI barcode of the watch is the same as the IMEI written into the watch when produce. Customers can edit the text message pw,123456,ts# to the watch by mobile phone.(The watch must be loaded with a card, the text message must be entered in English input method). if any problems, please ask your local distributors for help.

4) There are two cases that can't be registered.:

a.The device number does not exist or the device number was registered. You must ask your distributor

b. If display the account has been registered, the customer can register again by changing another account.

FCC Caution.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.
Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.
This Smart Phone meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. Thestandards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue for front of face and 4.0 W/kg averaged over 10 gram of tissue for wrist. Device types: T5 (FCC ID: 2AKM6-T5) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for Front of face is 1.383W/kg(separation distance is 10mm) and when properly worn on the Wrist is 2.035W/kg(separation distance is 0mm). The use of belt clips, holsters and similar accessories should not contain metallic components 25 in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.
