Battery Usage Notices:
- Use 2 pcs of 1.5V AAA non-rechargeable batteries for the remote controller.
- Use 1 pc of 3.7V rechargeable battery pack for the toy car.
- Insert/change batteries as per the correct polarity.
- Non-rechargeable batteries are not rechargeable.
- Do not mix old and new batteries, nor mix different types of batteries.
- Charge the rechargeable battery before the first use.
- Take out the exhausted batteries from the toy.
- The charging time is no more than eight hours.
- The power terminals should not be short-circuited.
- Take out the rechargeable battery from the toy before charging.
- The batteries can only be charged under adult supervision. Regularly check the wire, plug, shell and other components for any damage. Stop using when the damage is founded. Unscrew the battery cover with the screwdriver, and insert the batteries as per the correct polarity.
- The toy should only connected with the power recommended.

Notices: Turn off the power if the toy will not be used for a long time. Please take out the batteries from the toy and the remote controller if it will be stored for a long time, preventing damage due to the battery leakage.

Warning! Choking hazard.Small parts and small balls.
Warnung! Erstickungsgefahr.Kleine und kleine Kugeln.

changes or modifications not expressly approved by the party responsible for compliance could void the user' s authority to operate the equipment.
This equipment has been tested and found to comply with the limits for a Class B digital device， pursuant to Part 15 of the FCC Rules.These limits are designed to provide reasonable protection against harmful interference in a residential installation.This equipment generates， uses and can radiate radio frequency energy and， if not installed and used in accordance with the instructions， may cause harmful interference to radio communications.
However, there is no guarantee that interference will not occur in a particular installation.
If this equipment does cause harmful interference to radio or television reception， which can be determined by turning the equipment off and on， the user is encouraged to try to correct the interference by one or more of the following measures:
-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.
