Halfsun Cloud Album Quick Guides

I. System overview

Halfsun Cloud Album is a smart network cloud album system with family/friend circle built with concentration on the network cloud album and formed by the interactions among network cloud album, mobile client and network cloud storage. The functions and effects of each component are as follows:

1）Network cloud album:

Network cloud album is in cloud album version and environmental monitoring version.

A. Cloud album version: There is one or several "network cloud album" terminal devices placed in the home of the user's family. The major functions include: a. Synchronously receive photos, postcards, and video clips from the cloud; b. View photos and postcards; c. Watch short video clips; d. Change customized clock; e. Receive real-time weather information; f. Event alarms; g. Clock alarms; h. Multimedia playing;

B. Environment monitoring version: There are one or several "network cloud album" terminal devices placed in the home of the user's family. The major functions include: a. Synchronously receive photos, postcards, and video clips from the cloud; b. View photos and postcards; c. Watch short video clips; d. Change customized clock; e. Receive real-time weather information; f. Event alarms; g. Clock alarms; h. Multimedia playing; i. Monitor environment indexes PM2.5, PM10 and PM1. j. Monitor environment temperature and humidity; k. Monitor environment air quality.

2) Mobile agent application APP and APK: Compatible installation and running on smart phones in various brands and specifications, such as iPhone, Samsung, MI, HUAWEI, HTC and Lenovo, etc. The main functions include: Photo beautifying, postcard editing, invitation to family members and friends to join family/friend circle, cloud space management, batch sending of photos and postcards, video clip taking and sending, etc.

3) Network cloud space: Every "network album" system will automatically match cloud space with certain storage, which is shared by the family/friend circle members. All the photos, postcards and video clips sent to "network cloud album" from mobile phones are transited in cloud space and then transmitted to "network cloud album".

II. Network cloud album setup guides:

1) Switch on the device, and the main menu will appear. Select the setup button on the upper right corner and register the device. The detailed steps are as follows:

2) Measured environment data indication:

Note: Standard version does not include PM2.5/temperature and humidity/weather information indication. They are only included in premier version and above.

1. Language setting:

Select any one option for simplified Chinese and English. Click next and enter WIFI setup, as shown in the picture:

2. WIFI setting:

Search and find proper WIFI connection for home or office areas. Insert password and connect the wireless connection. Click next and enter user setup, as shown in the picture:

3. Time setting:

Time setup is divided as date setup and time setup. There are two modes of network automatic generation and manual input for time and date setup. The default mode when the system starts is network automatic generation. After manual setup is done, the default mode will change into manual setup mode. The detailed setup is as follows:

1) Date setting: Select the current year, select the current month, and select the current date. Then press "ok" button to complete the date setup. Details are as shown in the picture:

2) Time setting: Select the current clock hour, select the current clock minute, and select the current clock second. Then press "ok" button to complete the time setup. Details are as shown in the picture:

4. Download binding:

1) Mobile clients APP and APK downloading and installation

A. Scan the QR code on the screen: For Android mobile phones, choose Android QR code. For iPhones, choose iOS QR code. After scanning, download and install. Graphical representation:

2) Scanning QR code

For Android mobile phones, scan the following QR code to download and install. Graphical representation:

Android

For Apple mobile phones, scan the following QR code to download and install. Graphical representation:

IOS

3) Registration on mobile client:

After the installation of APK/APP on the mobile phone, select "cloud album 3" on the mobile application and enter album registration. After setting the information, click "ok" to complete user name and password setup. Details are as shown in the picture:

After the completion of user name and password setup, please log in. For details, refer to the picture example:

4) Mobile phone and cloud album binding

Open cloud album mobile client application APP or APK, and enter the settings interface in the upper right corner. Graphical representation:

Click "album binding" to enter the QR code scanning interface. Scan QR code of album binding, and click "ok" button to complete album binding. Graphical representation:

5) **Personalization setup**

After the completion of album binding, personalization setup can be done, including user name, password, album name, and profile photo, etc. Graphical representation:

6) **Cloud album related function guides:**

1> Several network cloud albums can be bound on one mobile phone. There is no limitation on the number of bound albums;

2> There is only one user name in the system for every mobile phone. Every user name can match with several network cloud albums;

3> Through selection of different cloud album names, the user can choose to enter different family/friend circles;

4> Every network cloud album matches with one custom personalized name;

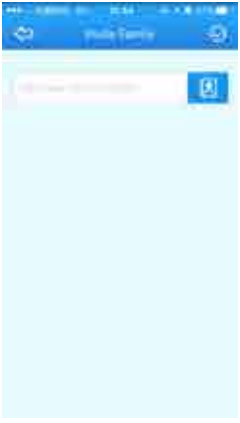
5> Every network cloud album matches with only one family/friend circle;

6> Every network cloud album matches with only one network cloud space.

III. Invite family members and friends to join network cloud album – Happiness Space

1. Form family/friend circle: As the owner of "network cloud album", through operations on mobile agent, you can invite your family members, friends and relatives to join network cloud album – Happiness Space, form happy family group and share the happiness sent in one click across the air.

2. Invite family members: Log in cloud album mobile client, click "My Family" to enter management interface, click "+" in the upper right corner, select the family member through manual input of family member's mobile numbers or search of family member's mobile number in the mobile contact list, and complete the invitation of family members. Graphical representation:



3. Invitation text message: After the completion of family member invitation, system will automatically send text messages from the owner's mobile phone to the invited family member. The text message includes all the necessary information for downloading, registration and login. Graphical representation:

4. Mobile clients APP and APK downloading and installation: The invited family member and friend can download and install APP or APK through the website provided in the invitation text message, or download, install, register and bind the cloud album through scanning the QR code on the network cloud album screen or QR code on the instruction book.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment。

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.
