Charging way

Earbuds and charging case are with built in rechargeable battary,Can not be dis-assembled ,Pls make sure the earbuds and case are fully charged before using it for first time.

Charge the case

- Connect the USB charging cable to the charging socket on the charging box of the headset. Connect the charging cable plug in the standard USB5V output power supply. During the charging process, the single digit of the charging box digital tube flashes.
- When the charging box is fully charged, the charging box's digital tube displays "100" to indicate that it is fully charged. Unplug the charging cable from the power socket.
- When the charging case is low, the digital tube display "15" flashes.

Charge the earbuds

- Put the left (L) and right (R) earphones into the charging case. The left (L) and right (R) earphone indicator lights in solid red to enterthe charging state (the charging indicator of the charging box is always on).
- When the left (L) and right (R) headsets are fully charged, the indicator light will go out and the charging box will automatically turn off the power.
- When the headset is low on power, the headset will beep at intervals, "please charge", and the indicator will flash red at intervals. If the headset is turned off at low power during a call, it will automatically transfer the call to the phone.

Accessories:

Weight of single earphone:	4.0g

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.
