Introduction to Watch Functions

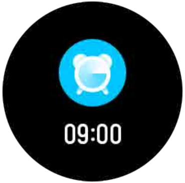
Low battery

When the watch has a low battery, the watch will show a low battery reminder.



Alarm reminder

Through the APP, you can add and set the alarm time, synchronize the watch to display the alarm time, and turn the alarm on or off.

Introduction to Watch Functions

1.Using in Wet Conditions

Your device is water-resistant, which means it is rain-proof and splash-proof and can stand up to even the sweatiest workout. NOTE: Do not swim with your Smart Bracelet. We also don't recommend showering with your wristband; though the water won't hurt the device, wearing it 24/7 does not give your skin a chance to breathe. Whenever you get your bracelet wet, dry it thoroughly before putting it back on.

2.Using Quick View

With Quick View you can check the time or the message form your phone on your Smart Bracelet without taping. Just turn your wrist towards you and the time screen will appear for a few seconds.

Introduction to Watc

1.Environmental Conditions

Operating temperature: 14℉ to 122℉
Non-operating temperature: -4℉ to 14

2.Size

Fits a wrist between 5.5 and 7.7 inches

3.Disposal and Recycling

Please kindly be aware that it is the co
to properly dispose and recycle Smart
components. Do not dispose of Smart
household waste, the Smart Bracelet u
waste and should be disposed of at yo
equipment collection facility.
For more information, please contact y
equipment waste management autho
you bought the product.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.
