

Retail Eye - Z3

Retail AI Camera Z3

Product Manual

Product I/O description:

Quick guide:

I/O description:

1. LAN port: Insert LAN cable to connect the AI-camera to network. The AI-camera supports two way to connect the network: LAN and Wi-Fi. Choose one based on your current environment. If both LAN and Wi-Fi exist at the same time, Wi-Fi is automatically disconnected after inserting the LAN cable.
2. CHARGER port: Type C port. When insert the charger cable to this port, within 10 seconds, the AI-camera will be turned on automatically.
3. mini HDMI port: To show images to a HDMI display, connect the AI-camera to the display device with HDMI cable via mini HDMI port.
4. OTG port: Type C port. To use a mouse device, connect the AI-camera to the mouse with USB cable via OTG port.
5. PC port: To copy data from the AI-camera to PC, connect to the PC with USB cable via PC port.
6. POWER KEY: Through this hole, press the power key inside with a little steel needle, the charger can be disconnected and the AI-camera will be shut down within 5s[the super capacitor inside the AI-camera only can support it within 5s];
- 7.Camera A or B port: Type C port. Connect to the sub-camera with type C cable via Camera A or B port. Remand: please connect the sub-camera before the AI-camera power on.
- 8.Zigbee 3.0: Built in ZigBee 3.0 module for IOT ad hoc network connection.

Button function:

(1) A Button	Power LED off → LED on after 5s, LED off Power LED on → Put down after 5s, LED off  If put down this button more then 3s,the system will restart.
(2) B Button	→App can receive Volume Up event
(3) C Button	→App can receive Volume Down event

LED description:

LED No.	LED status	Inter status	Power/ App	Light up
(1) Power	Light on	Power on	Power status	Put down this button, The LED is on for 5 seconds. After 5 seconds, the LED is turned off.

	Light off	App control off		
(3) App 2	Light on	App control on		
	Light off	App control off		
(4) App 3	Light on	App control on		
	Light off	App control off		

PC function description:

The AI-camera has an access control function of data. Before connecting the AI-camera to PC, connect the AI-camera to a HDMI display and a mouse, then enter PIN code. After entering PIN code, the valid period is 1 hour. After 1 hour, PIN code is expired, and need to re-enter PIN code.

The schematic diagram is as follows:

Succeed:

Fail:

If you want to connect the AI-camera as USB Storage to PC, Please enter PIN (initial password: 1981) first。

Working mode: continuous shooting

Item	Distinguish ability	Interval	Time of duration	Number of photos
Photo	13Mpix	1fps	2h	7200pcs
Photo	13Mpix	0.1fps	16h	5760pcs
Video	2Mpix	10fps	30min	18000pcs
Video	2Mpix	1fps	16h	57600pcs

Watch Dog Timer function:

- Automatic execution conditions
 - System freezes
 - App freezes
 - Camera Module freezes
- Manual execution condition
 - App restart sequence:
 - [1] App root execute (reboot)
 - [2] System reboot
 - [3] App freeze
 - [4] Watch Dog Timer Hard Reset
- Execute content
 - Hard Reset
 - Power off → power on

- Execute object
 - MTK6771(P60)
 - Camera Module
 - All of the external IC
 - (LAN/ USB Hub,etc)

If any part of the AI-camera module freezes, Watch Dog Timer cuts off the power of all objects on the AI-camera, and immediately power on all objects of the AI-camera: power off→power on.

Because the software restart function of Android OS is uncertain, the AI-camera provides Hard Reset function in Watch Dog Timer.

Eliminate of frequent malfunction:

1. Response of the AI-camera is slow
 - Check whether the network speed is normal.
2. Can't link the AI-camera to Wi-Fi
 - Check whether the password of Wi-Fi is correct.
3. When AI-camera is plugged in the charger, it doesn't power on
 - Please wait for 10 seconds after plugging the AI-camera in the charger.
 - If there is no response after more than 10 seconds, please check whether the charger is plugged in correctly.

Product technical parameters:

Item	Spec
CPU	MTK 6771 (P60)
Memory	4GB+64GB
Camera	IMX258 13MP PDAF
System	Android 10.0
Sensor	Gyro、M-sensor、G-sensor
Mic	Dual mic, for noise reduction
WIFI	Wi-Fi 802.11 a/b/g/n/ac compliant
BT	BT 4.2
ZIGBEE	ZIGBEE 3.0
Super capacity	2F

About FCC Statements:

This device complies with part 15 of the FCC Rules

Operation is subject to the following two conditions:

- (1) this device may not cause interference, and
- (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Warning: Changes or modifications to this unit not expressly approved by the part responsible for compliance could void the user's authority to operate the equipment.

FCC Radiation Exposure Statement

The device has been evaluated to meet general RF exposure requirement. The device can be used in fixed/ mobile (min 20cm) exposure condition .

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.
