➤ About ApplePie's setting options

Navigation app setup: Allows you to specify an APP to join our navigation software whitelist, and the system handles the sound type of this APP in accordance with the navigation software.

Voice assist: Allows you to specify an APP to use the original car's voice button (long press for 3 seconds) or the voice button on the floating ball to wake up.

Use the OEM GPS data: If this option is checked, the GPS data output from the OEM navigation hardware can be used. If the test is OK, the GPS antenna can not be plugged in. The vehicle does not have navigation hardware, or has navigation hardware, but does not implement GPS data transmission function specified in CarPlay standard protocol, then you can't check this option, you can only connect the GPS antenna to obtain GPS data.

Copy log file to SD Card: Copy the log of startup and system operation to TF card, mainly for R&D and debugging. Simple insert TF card and it will make Log automatically.

➤ About floating ball

The functions of the row of buttons after clicking on the floating ball to expand are: Home, Return, Recently, Voice, Return to the original car UI, Clear memory, and one button split screen display

● Restore APPS:

ApplePie pre-install many applications. If you updated new version of the APPS, and found it not works properly, You can install the pre-install APP again by Install Manager in ApkInstaller.

● Resolution choosing:

The ApplePie Mini resolution support the highest 1920*1080 and lowest 800*480 , Please Drag the green bar below photo to choose the right resolution according to the OEM headunit, Which will ensure the video play smoothly.

● Firmware Update :

1. Download the firmware and copy file update.zip to empty TF card directly without unzip.
2. Insert it to TF Card slot , turn on the unit it will copy the file to the smart box.
3. After it finishing copy , it takes 6mins to update. wait till it retoot.and take out TF card.

FCC Caution.

(1)§ 15.19 Labelling requirements.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

§ 15.21 Changes or modification warning

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

§ 15.105 Information to the user.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

RF warning for Mobile device:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
