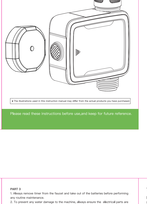
FCC Warning:
This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: The equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio/TV technician for help.

Radiation Exposure Statement:
The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

Product User Guide
SMART HOSE FAUCET TIMER
Model: SVR -07
Instruction Manual



★ The illustrations used in this instruction manual may differ from the actual products you have purchased.

Please read these instructions before use,and keep for future reference.

MADE IN CHINA

WELCOME

Congratulations on purchasing your Smart Hose Faucet Timer!

Faucet watering has never been faster, easier, or more convenient with the ability to control it from your phone. To access the timer, you can schedule watering, manual and monitor flow without climbing through your shrubs. It also allows you to water your lawn, garden, or any other plants for gardening, hydroponics, filling pet dishes, or even irrigation.

IMPORTANT INSTRUCTIONS

When using this smart water timer, basic precautions should always be followed, including the following:
- Read all instructions before using this smart device.

SAFE TIMER INSTRUCTIONS

PART 1
1. Make sure to follow the correct polarity indicated in the battery compartment to install the 2*CR2 alkaline AA batteries.
2. Do not use the charging to ensure whether the device is typical or not before setting the timer.

PART 2
1. Do not allow or submerge the timer in water or allow liquid to clean it.
2. Do not use the timer in high temperature or cold or place in the sun.
3. Do not assemble the equipment when it is switched ON.
4. This product is not a toy. Children should not play with it. Do not use water timer for anything other than the intended purpose.
5. This appliance should not be used by children or persons with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been supervised at all times, and/or have received extensive instruction and training on how to use this device by a person responsible for their safety. This appliance is not a toy.

PART 3
1. Always remove timer from the faucet and take out of the batteries before performing any maintenance.
2. To prevent any water or dirt ingress, always ensure the rubber gasket, the aluminum alloy connector and the inner thread of the faucet are free of any damage, specially and thoroughly dry all cables and electrical parts immediately.
3. Do not use the timer in a thunderstorm.
4. Replace all batteries at the same time. Batteries are fastened.
5. The product itself does not generate pressure, but the pressure of tap water is used. Please pay attention to the pressure of tap water when using the product.
6. When exporting frequently temperature changes, condensation may occur on the timer. Remove the hose faucet and shake it outward indoors to avoid potential freeze-damage.

7. **Filter traps are purchasing,replacing life of timer. Clean filter regularly and replace it soon.**

PART 4
1. Please activate the valve before use if you are using it for the first time or after a long period of time. Please ensure the valve is in the open position before installing the DIY-OUT-Valve to enter manual mode, then to press the ON/OFF button twice to arrive and draw the valve, repeat the above 2-3 times. Supplementary: In more than 3 months of non-use, the valve may be stuck due to the accumulation of dirt, sediment and transportation by various factors, the valve may appear to draw on its own. Then it needs to be activated manually.
2. Please ensure the hose faucet is tightly connected by connectors, do not use the timer if it is malfunctioning or has sustained any damage. For questions regarding a damaged product, contact us.
