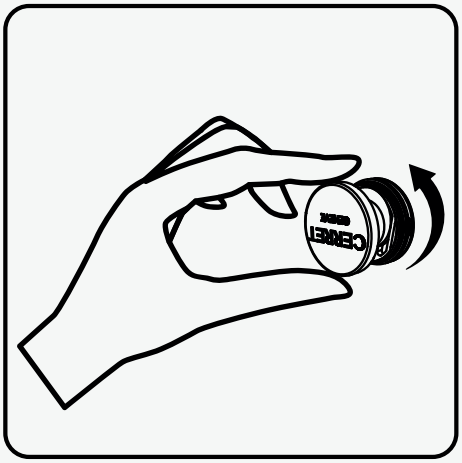
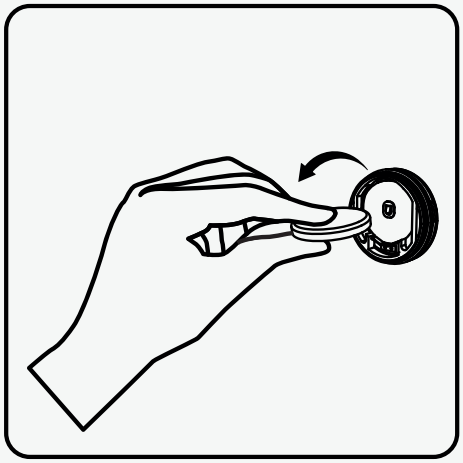
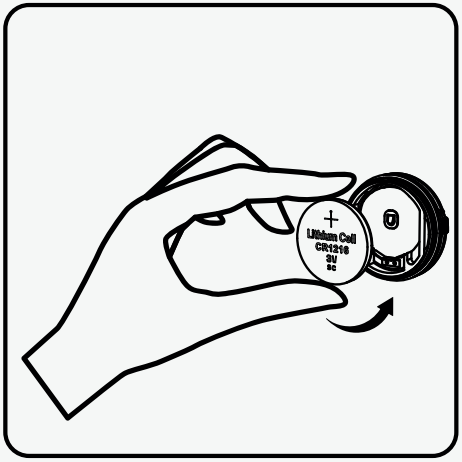
INSTRUCTIONS FOR BATTERY REPLACEMENT



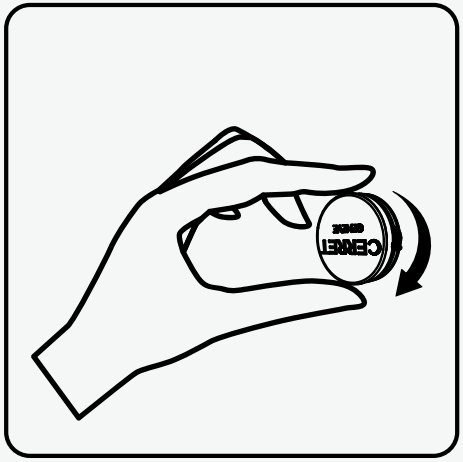
1. Unscrew back lid.



2. Take battery out.



3. Insert new battery with inscriptions facing up.



4. Put the lid back on.

WARNING

Do Not:
- Swim or bathe with your Bracelet.
- Expose your Bracelet to high pressure water.
- Use your Bracelet in a sauna or steam room.
- Intentionally submerge your Bracelet in water.
- Operate your Bracelet outside the suggested temperature ranges or in extremely humid conditions.
- Drop your Bracelet or subject it to other impacts.
- Disassemble your Bracelet.
- Use your Bracelet in temperatures in excess of the operating temperature (0° and 35°C)
- Store in temperature in excess of (-20° and 45° C).
- Use your product in a hot environment or near fire.
- Swallow or disassemble any battery, chemical burn hazard.

WARNING

If the battery from your product is swallowed, it can cause severe internal burns in just 2 hours and can lead to death. Keep batteries away from infants and children. If the battery compartment does not close securely, stop using the product and keep it away from infants and children. If you think the batteries might have been swallowed or inserted inside any part of the body, seek immediate medical attention.

Possible symptoms of battery consumption:
Unfortunately, it is not always obvious when a button or coin battery is stuck in a child's esophagus.
The child might:
cough, gag, or drool excessively; appear to have an upset stomach or a virus; be sick; point to their throat or stomach; have pain in their abdomen, chest, or throat; be tired or lethargic;
These symptoms may vary or fluctuate, with pain increasing and then subsiding.
A symptom of button and coin battery ingestion is vomiting fresh (bright red) blood. If this

occurs, seek immediate medical help.The lack of obvious symptoms is why it is important to be vigilant about "flat" or spare button or coin batteries in the home and the products that contain them.

This marking on the product, accessories or literature and without the bar on batteries indicates that the product, battery and its electronic accessories (such as charger, a headset, USB cable) should not be disposed of with other household waste.

AVERTISSEMENT

N'utilisez pas votre produit dans un environnement chaud ou à proximité d'un feu. Ne pas avaler ou démonter une batterie, risque de brûlure chimique. Si la batterie de votre produit est avalée, cela peut provoquer de graves brûlures internes en seulement 2 heures et entraîner la mort.
Gardez les piles hors de portée des nourrissons et des enfants. Si le compartiment à piles ne se ferme pas correctement, arrêtez d'utiliser le produit et tenez-le hors de portée des nourrissons et des enfants. Si vous pensez que les piles ont pu être avalées ou insérées dans une partie quelconque du corps, consultez immédiatement un médecin.

Symptômes possibles de consommation de batterie:
Malheureusement, il n'est pas toujours évident qu'une pile bouton soit coincée dans l'œsophage d'un enfant.
L'enfant pourrait:
Tousser, avoir des haut-le-cœur ou baver excessivement; Avoir des maux d’estomac ou un virus; Être malade; Pointer leur gorge ou leur estomac; Avoir des douleurs à l’abdomen, à la poitrine ou à la gorge, être fatigué ou léthargique; Ces symptômes peuvent varier ou fluctuer, la douleur augmentant puis diminuant. Un symptôme de l’ingestion de piles boutons et de piles bouton est le vomissement de sang. Si cela se produit, consultez immédiatement un médecin.
L’absence de symptômes évidents explique pourquoi il est important d’être vigilant à l’égard des piles boutons dans la maison et des produits qui les contiennent.

Ce marquage sur le produit, les accessoires ou la documentation et sans la barre sur les batteries indique que le produit, la batterie et ses accessoires électroniques (tels qu'un chargeur, écouteurs, un câble USB) ne doivent pas être jetés avec les autres déchets ménagers.

ADVERTENCIA

No utilice el producto en lugares calientes o cerca del fuego. No ingiera ni desarme ninguna batería, ya que podría causar quemaduras químicas. La ingestión de una batería del producto puede provocar quemaduras internas graves en tan solo 2 horas y resultar en la muerte. Mantenga las baterías lejos del alcance de los niños.
Si el compartimiento de la batería no cierra de manera segura, deje de usar el producto y manténgalo alejado de los niños.
Si sospecha que ha tragado una batería o que ha introducido baterías en alguna parte del cuerpo, busque atención médica inmediatamente.

Se señala en el producto, los accesorios o en la documentación, y la falta de una marca en las baterías, que el producto, las baterías y los accesorios electrónicos (como cargadores, auriculares, un cable USB) no deben ser desechados junto con la basura doméstica.
