Sleep S4

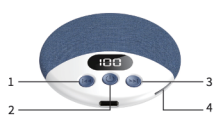
### Specification parameters

Bluetooth version: 5.4　　Product size: 68 * 13mm

Battery capacity: 200mAh　　Product weight: Approximately 28g

### Key Function Description



1: Long press to reduce volume, short press the previous track, double-click to set a timer for 30 minutes to shut down, double-click to cancel the timer;
2: Long press to turn on/off, short press to pause/play, double-click to switch Bluetooth/white noise/TF card;
3: Long press to increase volume, short press a song, double-click to set a timer for 60 minutes to shut down, double-click to cancel the timer;
4: TF card

### Instructions

1. Bluetooth mode: When the phone is connected to Sleep S4 Bluetooth, the battery display screen will turn off. If it is not connected to Bluetooth for 5 minutes, it will automatically turn off. If it is connected to Bluetooth for 15 minutes and there is no operation, it will automatically turn off Harmony and Android systems have low volume, which can be adjusted through Bluetooth settings on the phone. The volume of Bluetooth devices is synchronized with the phone.
2. The TF card switching mode will automatically turn off the screen, and when using the TF card, Bluetooth will automatically disconnect.
3. The maximum volume display value is (1-30). When the volume button is long pressed to increase or decrease, the display screen will show the volume for 5 seconds, Pressing the power button will display the battery level for 5 seconds.
4. Charging display: Display the battery level value during charging, and the display screen shows 100 when fully charged; The battery no longer fluctuates, indicating that the battery is fully charged. It has a long standby time of 150 days and can play continuously for up to 6 hours. Automatically shuts down during charging, with a charging time of approximately 1.5 hours.
5. The volume should be adjusted to below 15, making it inaudible to the person next to you. The soft sound effects should be seamless and not disturb others. Place the device at the bottom of the pillow and place the side sleeping ears above the device for optimal results.
6. To better ensure the charging life, please use a 5V-1A charging head. It is strictly prohibited to use fast charging to charge the device.

FCC Statement

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

--Reorient or relocate the receiving antenna.

--Increase the separation between the equipment and receiver.

--Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

--Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Radiation Exposure Statement**

This device complies with RF radiation exposure limits set forth for an uncontrolled environment. The device can be used in portable exposure condition without restriction.
