

CozyAir A3 Humidifier

Product Manual

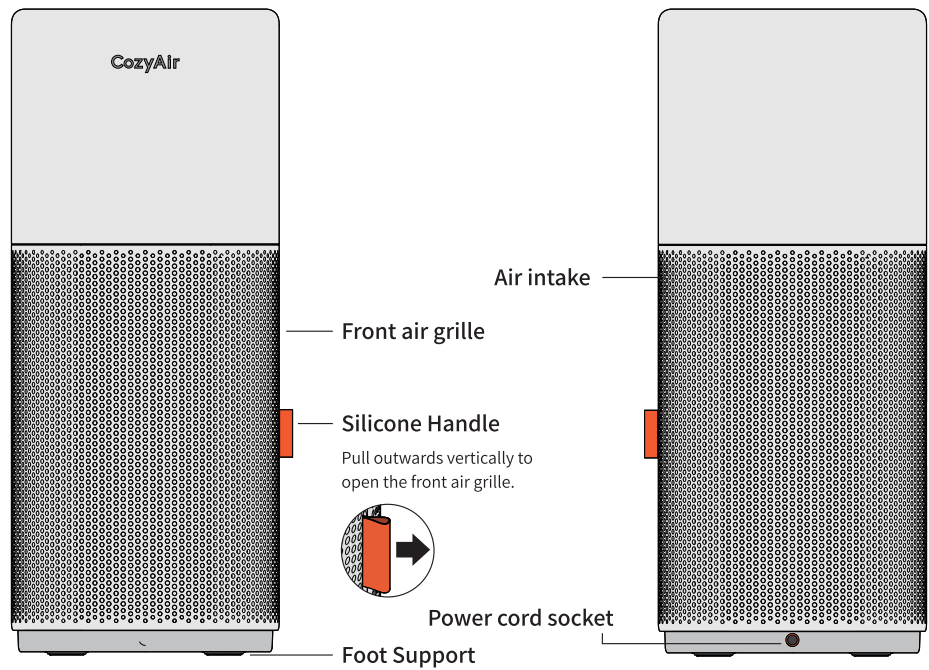

Safety

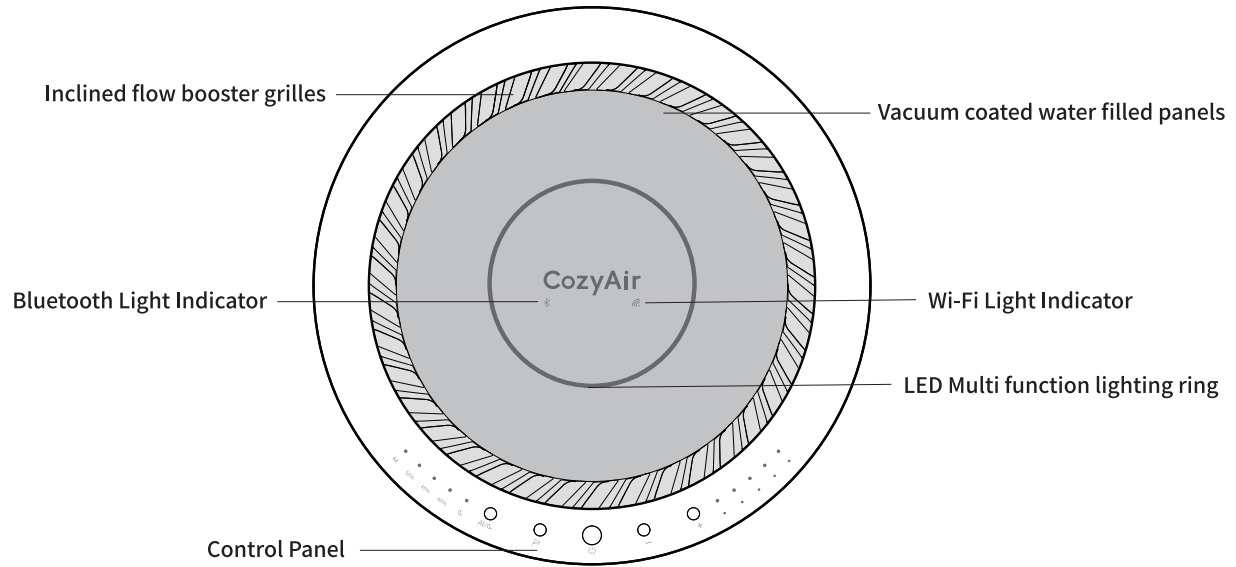

Please read carefully

Moving	To move the humidifier, unplug and wait for five minutes, do not place it upside down to avoid dripping.
Safety	Be sure to install the product correctly according to the instructions, otherwise electric shock, fire, personal injury and other damage may occur. Do not allow children or persons of unsound mind to operate this product.
Power Cord	Do not pull on the power cord when unplugging To unplug, grasp the plug, not the power cord. Do not pull or put heavy pressure on the power cord. Keep the power cord away from high temperatures. If the electrical cable is damaged. in order to avoid danger. it must be replaced by CozyAir or a CozyAir authorised professionals.
In Use	It is strictly forbidden to touch the power plug with wet hands to prevent electric shock. If the product has been damaged such as water immersion, unusual noise, odour or high temperature occur, please stop using it immediately. Please do not place any other objects in the water filling port to avoid entering the body. Do not use the humidifier on an uneven surface, it may lead to leaks. Please do not tilt the humidifier if there is water in the water tank and humidifying filter. It may cause water to enter the electrical board and motor.
Warning	It is forbidden to pour liquids containing impurities or corrosive liquids into the water injection port which may damage the machine. Do not use any parts or filters made by other manufacturers as this may damage the product and the consumers will be responsible for the consequences. This product contains UV-C light emitter. Improper use of the product, omission of the humidifying filter or damage to its housing may result in leakage of UV-C light. Do not look directly into the light source as this may damage your eyes and skin.

Air Filter

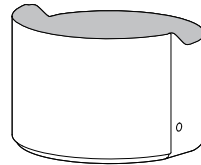

Wireless powered water lifters

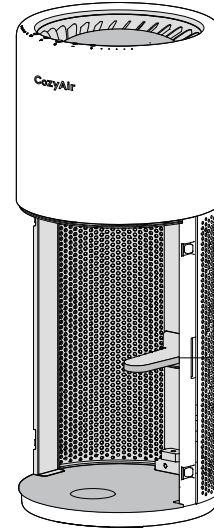

Air Filter Housing

Front air grille

Water Tank

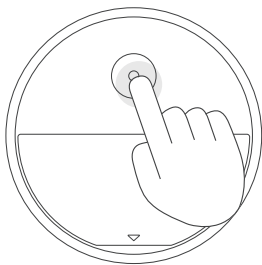

UV-C Light Emitter

Main Body

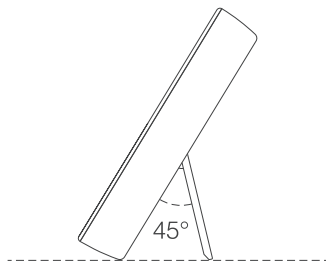

Bluetooth Temperature and Humidity Remote Display (Option)

Choose how to place the remote

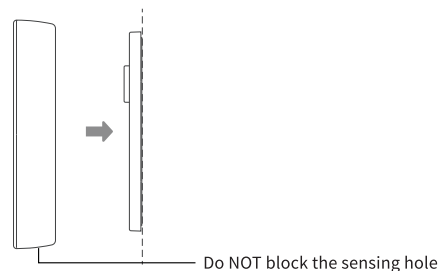

The Bluetooth thermometer can be placed on a desktop or attached to a wall, please choose your own way of using it according to the actual situation.

Click the button to toggle °C/°F

Desktop

Attached to Wall

Choose where to put the remote

The Bluetooth Temperature and Humidity Remote paired with the humidifier, will link up with the humidifier via Bluetooth. The humidifier uses the data from the remote to perform intelligent humidification. To provide an objective response to the room temperature and humidity, please place the remote away from the humidifier air outlet, heater and air conditioner to avoid affecting the accuracy of the data.

NOTE: Please Note:

Bluetooth Temperature and Humidity Remote Display is optional for purchase. Some models are not included in the package.

Maintenance

Please clean the water tank and filter monthly to maintain the best performance of your humidifier.

The humidification principle of the humidifier is to turn liquid water into gaseous water. The water molecules evaporate into the air, but the impurities in the water are not evaporated. Over a long period of time, impurities will continue to accumulate in the water tank and on the humidifying filter. Please check the condition of the humidifying filter and the water tank regularly.

Scan code to view cleaning video

Change the humidifying filter every 3 months

The humidifying filter will accumulate airborne dust and limescale over a long period of time. For the efficient and stable operation of the humidifier, it is recommended that you replace the humidifying filter regularly.

Please clean and dry before storing

If you are not use the humidifier for a long period of time, it is recommended that you empty the water from the tank and remove the accelerated filter to dry and store it.

The humidifier uses dual technology to control odours, but we still can't completely prevent them. If you experience the odours, please wash or replace the humidifying filter and clean the water tank.

Specification

Product Name	A3 humidifier	Model	A1320
Dimension	10 x 10 x 24 Inches	Weight	12 Pounds
Noise	18 – 47dB(A)	Humidifying capacity	1200 mL/h
Water Tank Capacity	1.5 Gallons	Voltage	24V
Power	37W	Use Environment	Can only be used above 4 Degree and can be used with normal tap water

Frequent Question

Problem	Solution
Humidifier not Switch on	1. whether the front air intake grille is fitted in place. 2. whether the water tank is in place. 3. Whether Wireless powered water lifters is in place. 4. Is the power plug plugged tight. 5. Is the power adapter connected in place
Not humidify	1. whether a humidifying filter is fitted. 2. Wireless powered water lifters is blocked.
Water Leaking	1. Is the water over the line. 2. whether a humidifying filter is fitted right.
How to Reset Humidifier	Press and hold  and  at the same time while power is on.

FCC Statement

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:

1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try correct the interference by one or more of the following measures:

- Reorient the receiving antenna. - Increase the separation between the equipment and receiver.
- Connect the equipment into and outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

The distance between user and products should be no less than 20cm
