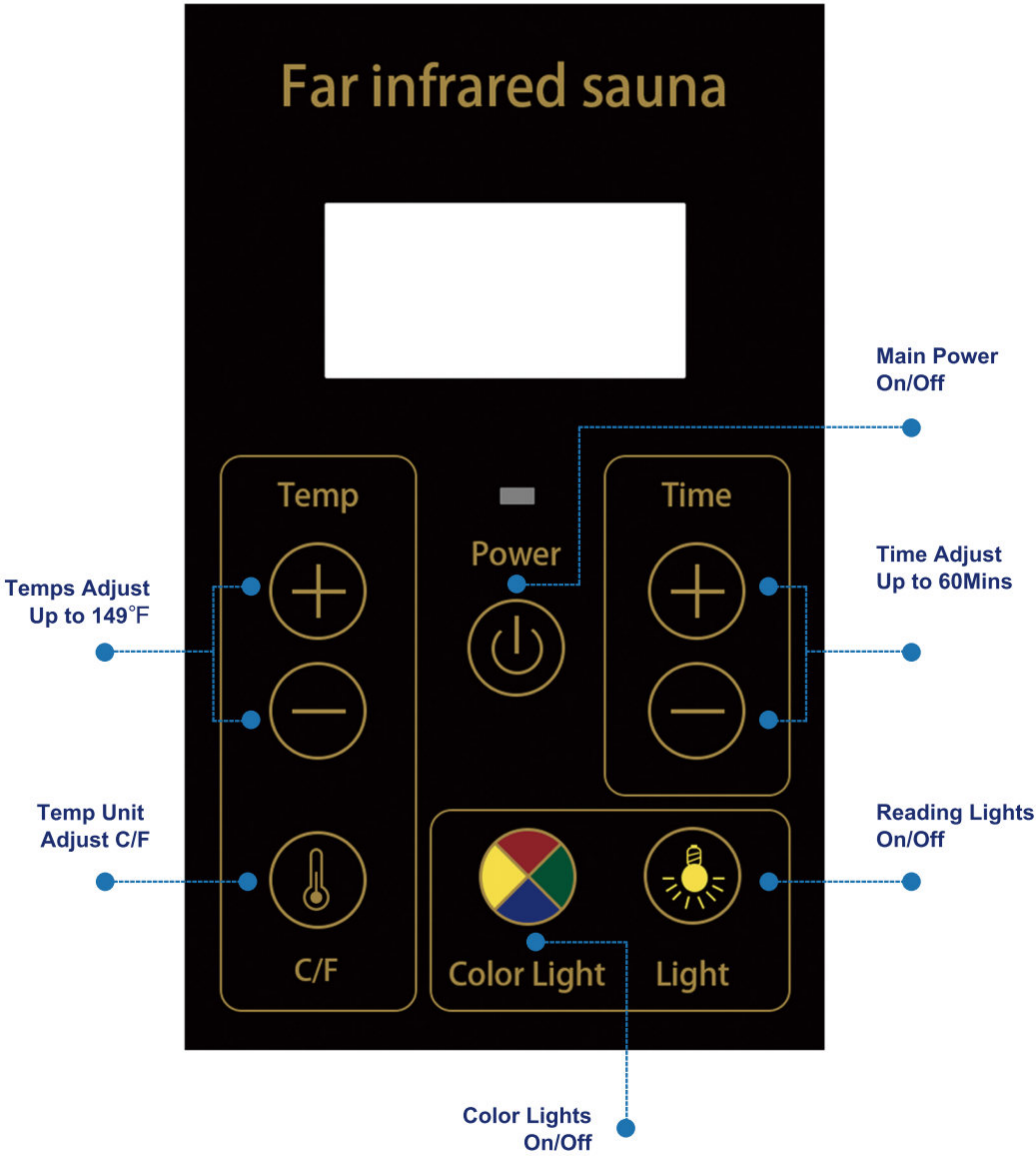
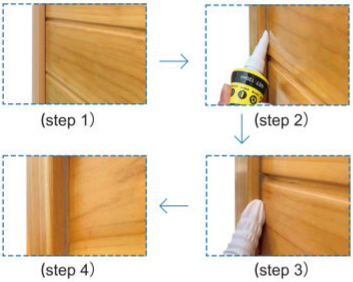
CONTROL PANEL INSTRUCTION



Important Note

- After completing the product assembly, please firstly test whether the appliance operates normally. After normal operation, please use our attached adhesive to seal the product, which can increase the waterproof and sealing effect of the product.

- The areas marked in red in the diagram need to be sealed as shown in the diagram, four places in total.



CHROMOTHERAPY LIGHTING SYSTEM

- Chromotherapy is the science of using color to tune the body's vibrations to frequencies that produce health and harmony.

- Each color has a specific vibrational frequency, and each vibration is associated with a different physical symptom.

- Chromotherapy helps balance your body by acting on various energy points through the full spectrum of visible light, with each color catering to a different need.

Tips for Installation and Maintenance

- We offer silicone vials for repairing cracks orholes in sauna wooden frames.
  The warranty folour product is valid for one year.

- For some large crack repair, you would also buy vial of silicone on local market.

- Pay attention to remove exceed silica gel after repair, for the silica gel would not be firmly attached if wood wax oil etc painted on wood.

- Please repair crack when you found it, otherwise it may get larger and cause sauna damaged.

- Please keep doing regular maintenance for sauna, at lease 1 time per 3-6 months after sauna is installed.

- It is strongly recommend to do maintain to the floor panel of sauna per 6 months, for it is easy to get rotted and damaged.

- When doing maintenance for bottom panel, please disassemble the sauna first and leave floor panel only.
  Flip the floor panel to dry its bottom face. After remove the dirt, painting second time with anti-corrosive coating .

- It is prohibited to major modify equipment body or electrical parts, or to connect external device.

- Please contact customer service for solution to those problem happened in installation, using or maintain. You will be assured to problem solved.

KEEP IN WELL CONDITION FOR SAUNA ROOM

- Place a large towel over the seat and baseboard before use to absorb excess sweat and prevent it from eroding the equipment.

- In order to prevent colds during use, it is recommended that the temperature be gradually lowered until the body gradually adapts to room temperature before stepping out of the equipment.

- If there is a lot of sweating after using the device, it is recommended to take a shower after 60 minutes, or use a room temperature wet towel to wipe the body after using the device, which is also an alternative to showering. It is also a good alternative to showering and is better for the skin.

- After use, open the door and ventilate for about 10 minutes, during the ventilation process, the device can be turned off, and the residual temperature can also be used to evaporate the internal water vapor.

- If there is sweat dripping onto the surface of the board or heating plate, etc., you can use a damp towel to wipe it in time to prevent discoloration and leaving stains, etc.

- The door just has a magnetic suction device, can not prevent violent entry, please pay attention to children, the elderly, pets and other bad entry.

- It is strictly prohibited to add locking devices to the door when using it, and it must be ensured that people can enter and exit conveniently at any time.

Federal Communications Commission (FCC) Statement.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide Reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

•Reorient or relocate the receiving antenna.

•Increase the separation between the equipment and receiver.

•Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

•Consult the dealer or an experienced radio/TV technician for help.

Warning: Changes or modifications made to this device not expressly approved by **Maester (Jiangsu)Medical Device Technology Co.,LTD** may void the FCC authorization to operate this device.

Note: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

RF exposure statement:

This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. The device is installed and operated without restriction.
