6. "One-Click" Instructions

1.Prepare before use

First scan the QR code or the APP store to download the app

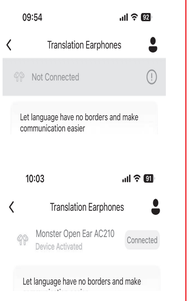
Android OR Code Download

IOS Code Download

Before using the translation headset, please follow these steps:
Scan the QR code of the manual/packaging box to download and install;
In all major mobile APP store, search for "one-click" app.
Make sure your headphones are fully charged.

2.Use the procedure

Open the "One-Click" app and tap on "Translation Earbuds"to access the main interface.Click "Disconnect" in the upper right corner of the" Translate Earphones" interface, find the earbuds name corresponding to your earbuds in the Settings of the mobile phone system and connect it, and return tothe "Translate earbuds"



Depending on your needs, the app offers three translation modes, Select a mode by tapping its name, and follow the on-screen instructions to proceed.

Touch Mode

Touch Mode
Two people wear a earphone, click or touch the earbud to start translation in real time, suitable for acquaintances who are willing to wear your earphone

To speak, touch the earbud and wait for a "beep" soundbefore starting, Both users will hear the translation simultaneously, When the other person wants to speak they can touch their earbud and wait for the "beep before beginning.

Speaker Mode

Speaker Mode
One person wears earphones and one person holds the mobile phone, suitable for people who are inconvenient to wear your earphones

You tap/double tap the headset (or tap the bottom half screen of the phone) to start talking, and then the phone will play the translated content, Tap the top half screen of the phone, indicating that the other person is talking into the phone, and you will hear the translated content from the earbuds.

Free talk Mode

Free talk Mode
Both of them wear a earphone, translate in real time, release their hands, and communicate freely

Two people, each wearing a headset, tap/double tap the earbuds, (or tap on the screen to start recognition), real-time translation, free hands, free communication.

Ofine translation

Ofine translation
Ofe network can also be translated to support multi-languages, a necessary artifact for traveling abroad

First of all, **in the case of connecting to the ne**twork, download the source language and target language required for translation in advance, wear headphones to enter the offline translation, and click the microphone button below to start speaking.

Audio/video call translation

Audio/video call translation
Face to face communication without language barriers
Transparent cross-border meetings, cross-border friends

Click the "Audio/Video Call Translation" function, users can choose video call translation or voice call translation according to their needs in this interface, set the language of both parties, and then click Invite friends to call, share the link to friends to translate the audio and video call with friends as shown.

Photographing

Photographing
It supports real-time photo translation and import photo translation as well as editing and copying functions

The translation results can be displayed in two ways: graphic comparison and text comparison . You can choose according to your preferences, and it can be used for taking photos of tourist signs, ordering menus, learning and other scenes.

Note: Offline translation, audio/video call translation, photo translation (online/offline), are value-added service items, and users can pay for the services based on their individual needs.

3.Setting
Go to the app's main interface and tap the icon in the top-right corner to access "My Profile." From there, select "Settings" to configure basic preferences, System language (Android adaptive mobile phone system language):
To change the app's language, tap "System Language" and choose your preferred option. The app interface will update to reflect your selection.

4.Common Problems

Fully charge the earbuds before uses for the first time.Make sure that the connection is successful.open any music APP, check whether there is sound in theeft and right ears.

Connection. Place the translation earbuds into the charging case, then remove and reinsert them. Ensure the earbuds and charging case sync, indicated by the translation earbuds lighting up. Once they light up, take them out, wear both earbuds, and search for the earbuds on your phone's settings.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
