注意与双击操作区分。

Detailed Description of Touch-Slide Function Keys:

Music Play/Pause: Double-tap the touch area
Volume Control: Swipe forward to increase volume, swipe backward to decrease volume
Next Track: Long-press the touch area
Previous Track: Triple-tap the touch area
Touch-Slide Function Key Instructions
1.Music Play/Pause (Double-tap the touch area)
Function/Operation: Quickly double-tap the touch area to play or pause the current audio.
Key Points:
• Keep the interval between two taps short (<0.5 seconds) and ensure they occur at roughly the same location.
• Double-tap to pause during playback; double-tap again to resume playback when paused.
2.Volume Control
Operation:
• Increase Volume: Swipe forward (toward the lenses) on the touch area.
• Decrease Volume: Swipe backward (toward the ears) on the touch area.

Swipes must be clear and continuous, with a defined travel distance (approximately 1 cm).
Each swipe adjusts the volume by one level.
Continuous swiping enables rapid adjustment.
3.Next Track (Long-press the touch area)
Function/Operation: Press and hold the touch area for about 1 second to skip to the next track.
Key Points:
• Maintain pressure until feedback is received. Short presses are invalid.
• This action skips the currently playing item.
4.Previous Track (Triple-tap the touch area)
Function/Operation: Extremely quickly triple-tap the touch area to return to the previous track (or restart the current track if near the beginning).
Key Points:
• Three taps must be faster than a double-tap and occur at roughly the same location.
• Ensure this gesture is distinct from double-tap actions.

安装更换镜片操作说明：

在镜框边缘处，找到标记有箭头的更换位置（即凹槽入口），将新的镜片边缘，对准箭头所指方向定位凹槽，用手轻轻地将镜片向下压，镜片会顺势沿着凹槽滑动并平稳地嵌嵌进镜框的相应卡位中。当感觉到镜片完全嵌入，并且四周与镜框紧密贴合、无松动时，即为安装完成。

Instructions for installing/replacing lenses:

Locate the replacement position marked with an arrow (the groove entrance) on the frame edge. Align the edge of the new lens with the groove in the direction indicated by the arrow. Gently press the lens downward—it will slide along the groove and smoothly snap into place. When the lens is fully seated, fits snugly with no gaps, and feels secure, installation is complete.
