

12/23/2021

To Whom It May Concern:

The BTADS SENSOR and GATEWAY components shall include the following FCC labeling. There are two instantiations of the label; a 2x4" version inclusive of the FCC logo, and a smaller 1"x2 5/8" version which excludes the logo.

The labels are provided via InkJet™ printing onto standard Avery clear labels, products 8663 and 18660 respectively. Each label shall consist of black print onto a clear label; which will allow the unit housing color to show through.

It is recognized that as an industrial application, it is likely that the labeling may wear off over time when attached to the outside of the SENSOR and GATEWAY units. As such, each unit shall include the smaller of the two labels on the unit exterior at the time of installation; plus the larger label on the inside of the unit under the cover.

The following text is included.

Internal:

FCC ID: 2A26D-159184

This device complies with Part 15 of FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

External:

FCC ID: 2A26D-159184

This device complies with Part 15 of FCC Rules.

Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

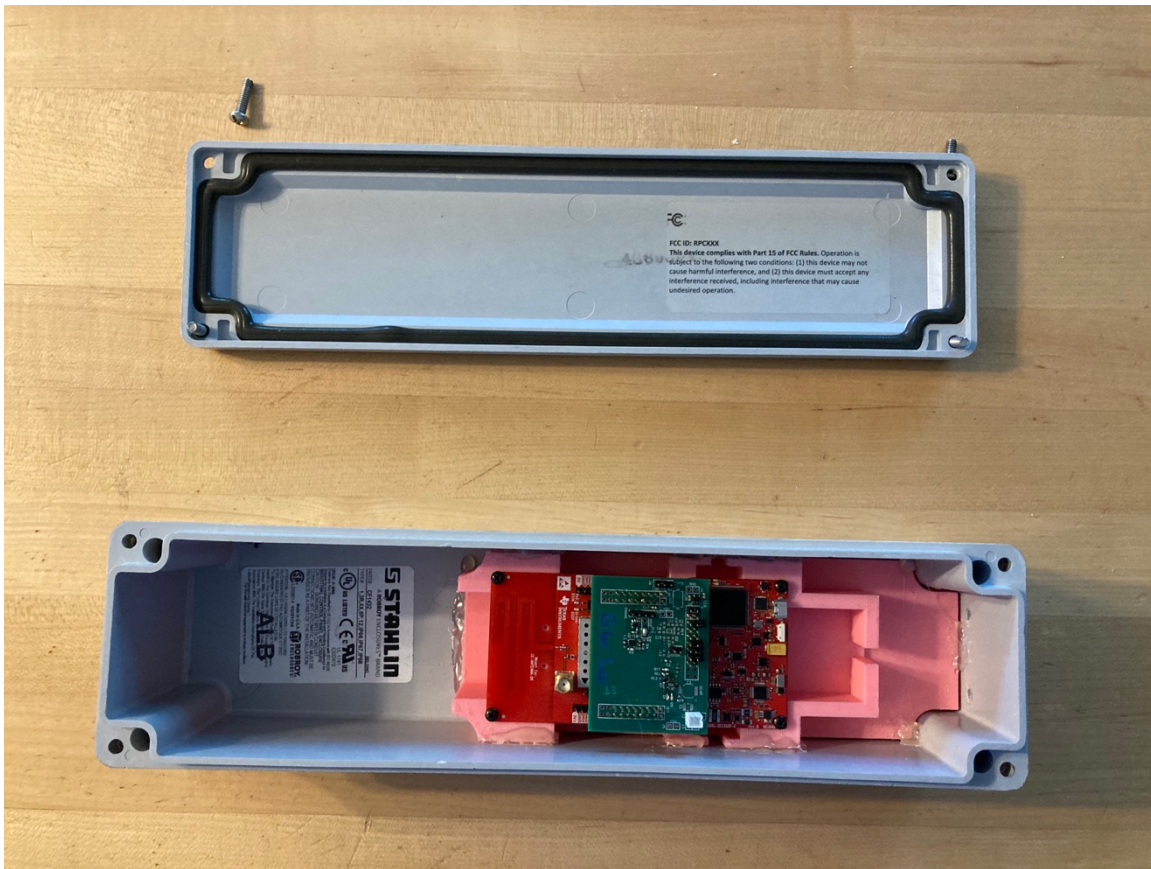

The placement of each label is shown below.

BARGETENDER

Internal 2x4" Label:

Note at the time of photos, the FCC ID had not yet been assigned.

Sincerely,

Dave Comisky
