Dear sir/madam

I believe you now have a complete set of documents supporting our application form 731, covering a 9GHz Search & Rescue Transponder (SART) for marine applications. Our colleague and US agent, Robert Negron of Negron Marine Consultants, lodged this application on our behalf. Our FCC ID is RIKS701.

Our application for EU Marine Equipment Directive 'Wheelmark' approval is nearing completion with Bureau Veritas – we have been told to expect our Wheelmark certificate in the next week. I will upload a copy of the certificate into the 'Test Results' section of the FCC submission website unless I receive instructions to the contrary.

Please copy any further correspondence regarding the approval to myself as well as to Mr Negron, and please let me know if there is any further information I can supply to further support our application.

Please accept my thanks for your guidance and assistance during this application.

Yours faithfully

C R Watts
Managing Director
SevenStar Electronics Ltd
