

Note: Please use the specified block copy for the print content.

Material: White (Matte) PET 50μm

Color: Pantone Black C

Process: PP coating after printing

Apply glue to the back (Similar Nitto No. 500)

This label is made of PET material.

In addition to being strong against expansion and contraction, it is hard to peel off because it uses an adhesive with excellent adhesiveness.

In addition, since it is coated with PP, the printed content is hard to erase.
