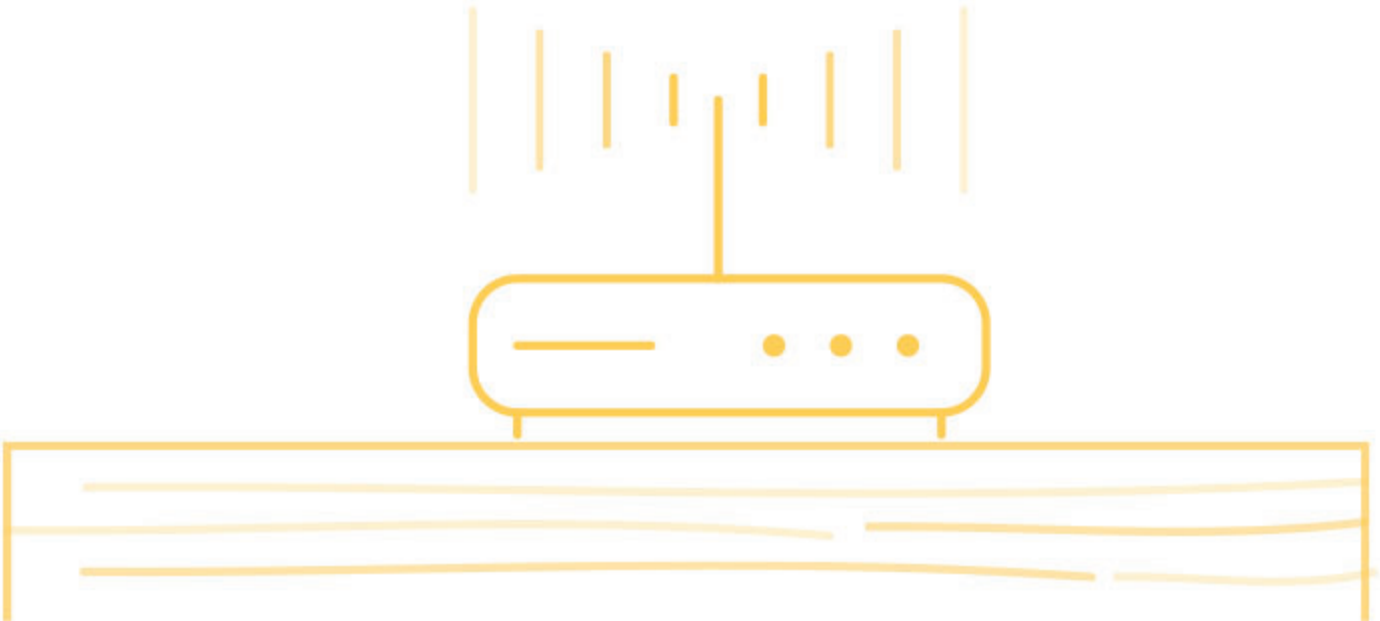
CHAT

Right out of the box, start a conversation with your family about Circle. Don't be shy. Tell them what Circle does and see how the discussion unfolds.

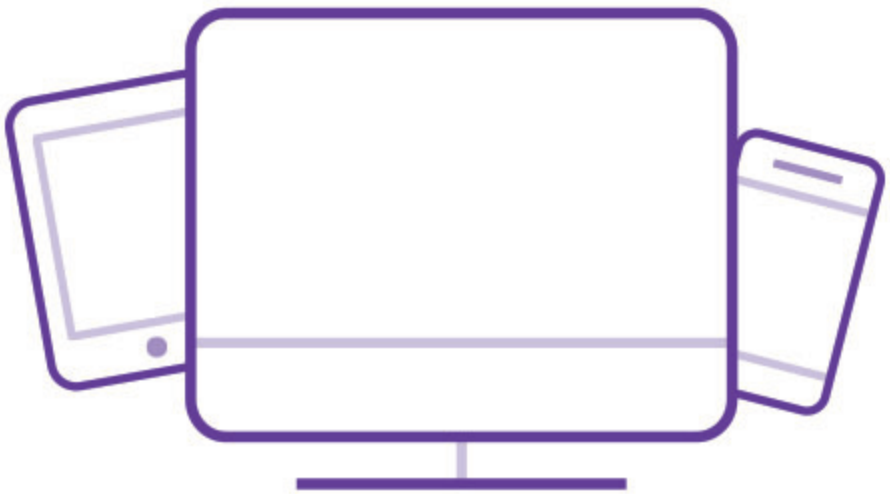


WI-FI

Circle can manage the Wi-Fi connection of any device in your home. Unless it's offline or using cellular data, Circle's got you covered.

ADMINS

Need more than one family member to control your Circle? Not a problem. Anyone with the Circle app and a secure passcode can manage Circle.



DEVICES

Assign devices to the entire home or an individual family member. It's easy to switch who a device belongs to on the fly.

AWAY

You can manage Circle's settings from anywhere with the Circle app, whether you're at home or away.

INSIGHTS

See how your family spends time online and what interests them the most. Get to know them in a whole new way with Insights.

TIME ONLINE

Create Time Limits that make sense for your family and make sure BedTime actually happens. (:

ENJOY

Find some balance between your offline and online life with Circle and connect more with your family.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
The distance between user and device should be no less than 20cm.

IC STATEMENT

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

The distance between user and device should be no less than 20cm.
la distance entre l'utilisation et l'appareil ne doit pas être inférieure à 20 cm

SETTING UP

Use the Circle Home app to pair Circle with your home network. If your network has more than one router, uses a multi-band router, has its own firewall, includes network extenders, or uses advanced router settings, take a quick look at the Network Helps section of support.meetcircle.com. We want you set up right the first time.

FINDING DEVICES A HOME

Circle sees every WiFi-connected device in your home - printers, thermostats, iPads, video-streaming boxes - everything. If you want Circle to ignore some devices, make them "Unmanaged Devices" during setup rather than assigning them to a profile. If you want Circle to manage a device but aren't sure what it's name is, head over to mycircle.meetcircle.com on that device and tap the image at the top right of the screen to display or hide its Device Name.

TAKING A TEST DRIVE

Once you have Circle setup, check out how it's working in your home. Select someone who has a device assigned to them and press the pause button, and then check to see if that device can get online anymore. Once you've confirmed that's working, you know Circle is managing your home. Oh, and don't forget to unpause them!

GOING FASTER

In most cases, your Circle will perform great in your home paired wirelessly with your network, so start out that way. If you notice that your network is moving a bit more slowly after installing Circle, use the Ethernet cable to connect Circle directly to your router.
