Safety Instruction

For your safety, please read the following instructions before you use the product. Serious injury or property damage may be caused by improper operations. Do not try to repair the product on your own.

Disconnect from power supply immediately if major failures occur.
Major failures include: Smoke, peculiar smell or abnormal sound is discharged from the product.

In the preceding scenarios, do not continue to use the product. Disconnect power supply immediately and contact professional staff for troubleshooting.

Do not place the product in high temperature environments.
◆ Do not place the product near a heat source, such as a radiator, a heat reservoir, a stove or other heating products.
◆ Do not expose the product to direct sunlight, which may cause high temperatures and subsequent faults in the product.

Do not damage the power cable.
◆ Do not damage, change, bend, or forcibly drag the power cable.
◆ Do not forcibly drag the cable when you pull out the power plug. If the power cable is damaged, please contact the local distributor to repair or replace it.
◆ The power cable in the accessory box is for this product only. Do not use it on other products.

Keep away from the product when you use a radio.
The product complies with the international EMI standard to prevent radio interference. However, interference may still exist and causes noise in the radio. If noise occurs in the radio, try the following solutions.
◆ Adjust the direction of the radio antenna to avoid the interference from the product.
◆ Keep the radio away from the product.

Do not drop liquid, metal or anything combustible into the product.
If any liquid or metal is dropped into the product, power off the product and disconnect power supply, then contact professional staff for solutions.

Do not use the product in an improper place.
◆ Do not use the product in humid placing, such as the bathroom, the shower room, or outdoor environments that experience rain, snow or other harsh weather. Avoid place near hot spring vapor. The preceding environments may cause faults in the product or electric shock under extreme conditions.
◆ Do not put an exposed fire source, such as an ignited candle, on the product.

Do not open the cover or change the product on your own.
If inspection, adjustment, or maintenance is required, contact with local distributor for help.

Use the specified power supply.
To prevent the product from being damaged, do not use any type of power cables other than type provided with the product.

Additional advice:
◆ Use the product in an environment with comfortable lighting. It is harmful to your eyes to watch in a too bright or too dark environment.
◆ Relax your eyes after a period of time for watching.
◆ Adjust the volume to an appropriate level, especially at night.

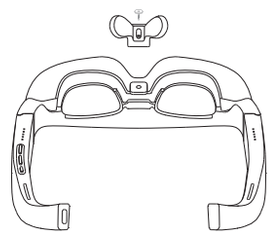
2 Installation and Use

Selecting the nose pad
There are three types of nose pads that come with the product as shown below: nose pad 1 (pre-installed on the glasses), nose pad 2, and nose pad 3.

Select and adjust a nose pad and adjust the wearing position of the glasses for improved comfort and visual experience.

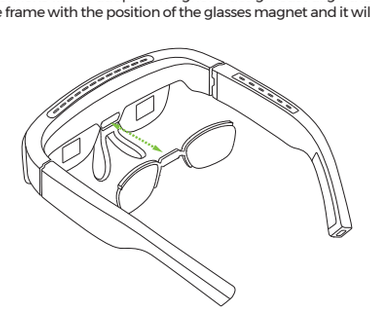
Installing the nose pad
To replace the nose pad, please use the screw driver to remove the screw, then pull out the nose pad in the opposite direction and remove the original nose pad, then insert it into the slot completely in the direction shown below and tighten up the screw and nose pad gasket.



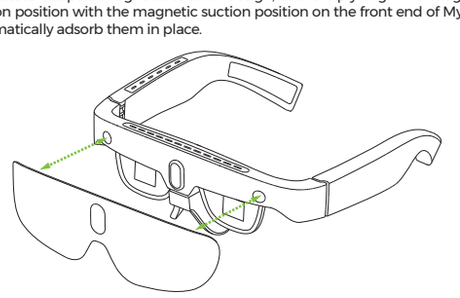
Install the prescription lens frame (skip this step if not needed)
Customizing the Prescription Lenses: Take the prescription lens template from the accessories box to the local optical shops to customize your own prescription lenses (additional fees needed) if you wear glasses. Before customizing your prescription lenses, ask the optician to comprehensively evaluate the assembly method of the frame template to ensure that the thickness of the processed lenses and the width of the lens frame can meet the assembly requirements.

Prescription lens frame

The prescription lens frame adopts a magnetic design. Just align the magnetic position of the frame with the position of the glasses magnet and it will automatically attract.



Installing the Sunglasses
Sunglasses adopt a magnetic suction design, and simply align the magnetic suction position with the magnetic suction position on the front end of MyW to automatically adsorb them in place.



Storing the glasses in the Glasses Case
When the glasses are not in use, it is recommended to store the glasses in the glasses case immediately.

Tips: When you tidy up and store the data cables, prevent the USB-C metal heads of the data cables from scratching the optical lenses of the glasses.

Ports	Type-C USB (Charging & Data transfer)
Storage Temperature / Humidity	-20˚C – 60˚C / 0% – 90% (no condensation)
Working Temperature / Humidity	0˚C – 40˚C / 20% – 80% (no condensation)

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement.
