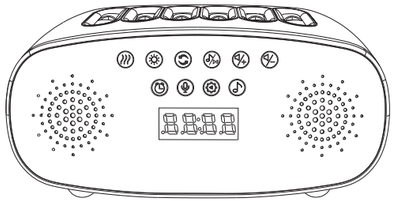
PICKUP DYNAMIC HUMIDIFIER

INSTRUCTIONMANUAL



USER MANUAL

Thank you for purchasing this product, please read the instruction manual carefully before using this product

Product specification

Product model: 285
Input Current: DC5.0V/2.0A
Product Size:195*139*92MM
Raw material:ABS+PC
Origin:China

Current:≤1300MA
Rated power:≤6W
Net weight: 508G
Water tank: 500ML
Spray volume: 15-30ML/H
Executive standard:
GB 4706.1-2005
GB 4706.48-2009

The alarm will stop sounding after a maximum of 5 cycles. Press the alarm button at any time to interrupt and exit snooze. After exiting snooze, the display will display normally and no longer flicker.

Matters needing attention

1.When using for the first time, please put the absorbent cotton swab into the right amount of water, so that it completely absorbs water, in the use of this will achieve the best results. If a new machine or a long-term unused machine has no spray for about 3 minutes during use, that is a normal phenomenon, this process is used for the absorption of cotton swabs, when the cotton swabs absorb water, it will soon produce atomization effect, and the machine begins to work normally.
2.Please use the included Type-C 2A power cord. If an alternative power cable is used, yes Note that the current specification is 2A, otherwise it will affect the atomization effect.
3.During the operation, the sound in the water tank is the atomization sound, which is a normal phenomenon.
4. Add water before using this product, and it is forbidden to use the humidification function in the case of water shortage;
5. When cleaning the product, please do not wash directly with a tap to avoid the possibility of product short circuit.
It is recommended to use a meat cotton cloth to wipe;
6. Do not let children aged 0-6 use this product alone
7. It is forbidden to stand upside down if there is water in the water tank

Package contains

One humidifier, one instruction manual, Remote control
Type–C cableX1, Spare cotton swabs 6

FCC Warnning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection againstharmful interference in a residential installation. This equipment generates, uses and can radiateradio frequency energy and, if not installed and used in accordance with the instructions, maycause harmful interference to radio communications. However, there is no guarantee thatinterference will not occur in a particular installation. If this equipment does cause harmfulinterference to radio or television reception, which can be determined by turning the equipmentoff and on, the user is encouraged to try to correct the interference by one or more of thefollowing measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1)This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
