Wireless Speaker F02

Instructions and Warranty Card

Federal Communications Commission Notice
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

Product Introduction

- Hands-free key
- Phone ring/mute
- Total 2watt high-fidelity sound
- Type-C charging port
- Micro SD card slot
- Charge indicator
- 3.5 audio jack

Instructions

1. Power switch: Long press power button for 2 seconds to turn on the speaker, long press power button for 3 seconds to turn off the speaker.
2. Pair TWS(Left/Right)speaker: Long press the volume up button and the volume down button simultaneously for 3 seconds to enter pairing mode, the speaker will automatically pair with another speaker.
3. Pair Bluetooth: Short press to switch playback in music mode, long press for 3 seconds to enter Bluetooth pairing mode, the speaker will automatically reconnect to the last paired Bluetooth device.
4. Hands-free key: Short press to answer phone call, long press to reject phone call.
5. Play/pause music: Short press to play/pause music, long press to switch to next music.
6. Volume up/down: Short press to adjust volume, long press to switch to previous music.
7. LED light indicator: Blinking red and blue alternately slow to adjust volume. Blinking red and blue alternately fast when turned on, short press the lighting button to switch to the next lighting effect, long press the lighting button to turn off the lighting effect in sequence.
8. LED light indicator: Blinking red and blue alternately slow: Pairing successful. The blue light turn off: Pairing failed. Blinking red and blue alternately fast: Pairing mode. Charging mode: The red charging indicator light is constantly on. Charging completed: red light off, blue battery status indicator turns on.

9. Bluetooth audio connection: Connect the speaker to a Bluetooth-enabled device, or unpair/forget the speaker from the Bluetooth device, then pair the speaker with the device. Ensure the speaker is paired by searching for "F02".
10. Micro SD card playback: Insert a Micro SD card, the Bluetooth function will be in sleep mode, the speaker will automatically play the music in the Micro SD card. After successfully connected, the blue light will continuously flash for 3 seconds.
11. Left/Right speaker: Left speaker is the "master speaker", right speaker is the "slave speaker".
12. Pairing two speakers: Long press the volume up button and the volume down button simultaneously for 3 seconds to enter pairing mode, the speaker will automatically pair with another speaker.
13. Left speaker: Only when the two speakers are connected to Bluetooth, the speaker can a play music. When the two speakers are connected to Bluetooth, the speaker can a play music, phone calls, control music, hands-free phone calls, and answer or reject phone calls. When the two speakers are connected to Bluetooth, the speaker can a play music, phone calls, control music, hands-free phone calls, and answer or reject phone calls. When the two speakers are connected to Bluetooth, only the left speaker can a play music, phone calls, control music, hands-free phone calls, and answer or reject phone calls.
14. Right speaker: Only when the two speakers are connected to Bluetooth, the speaker can a play music. When the two speakers are connected to Bluetooth, the speaker can a play music, phone calls, control music, hands-free phone calls, and answer or reject phone calls. When the two speakers are connected to Bluetooth, only the left speaker can a play music, phone calls, control music, hands-free phone calls, and answer or reject phone calls.

Safety guidelines

Please read carefully before using the product and keep it for future reference.
1.Do not place the product near heat sources such as heaters, stoves, or ovens.
2.Do not place the product in environments with high temperatures, direct sunlight, or prolonged exposure to high temperatures.
3.Do not place the product near water sources such as sinks, bathtubs, or swimming pools.
4.Do not place the product in environments with high humidity or prolonged exposure to moisture.
5.Do not place the product near magnetic fields or magnetic materials.
6.Do not place the product near sharp objects or in environments with sharp objects.
7.Do not place the product near flammable or explosive substances.
8.Do not place the product near chemicals or in environments with chemicals.
9.Do not place the product near pets or children.
10.Do not place the product near electronic devices that are sensitive to electromagnetic interference.
11.Do not place the product near medical devices or in environments with medical equipment.
12.Do not place the product near high-voltage equipment or in environments with high-voltage equipment.
13.Do not place the product near vibrating equipment or in environments with vibrations.
14.Do not place the product near high-pressure environments or in environments with high pressure.
15.Do not place the product near high-speed moving objects or in environments with high-speed movement.
16.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
17.Do not place the product near high-intensity light sources or in environments with high-intensity light.
18.Do not place the product near high-temperature objects or in environments with high temperatures.
19.Do not place the product near high-pressure objects or in environments with high pressure.
20.Do not place the product near high-speed moving objects or in environments with high-speed movement.
21.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
22.Do not place the product near high-intensity light sources or in environments with high-intensity light.
23.Do not place the product near high-temperature objects or in environments with high temperatures.
24.Do not place the product near high-pressure objects or in environments with high pressure.
25.Do not place the product near high-speed moving objects or in environments with high-speed movement.
26.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
27.Do not place the product near high-intensity light sources or in environments with high-intensity light.
28.Do not place the product near high-temperature objects or in environments with high temperatures.
29.Do not place the product near high-pressure objects or in environments with high pressure.
30.Do not place the product near high-speed moving objects or in environments with high-speed movement.
31.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
32.Do not place the product near high-intensity light sources or in environments with high-intensity light.
33.Do not place the product near high-temperature objects or in environments with high temperatures.
34.Do not place the product near high-pressure objects or in environments with high pressure.
35.Do not place the product near high-speed moving objects or in environments with high-speed movement.
36.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
37.Do not place the product near high-intensity light sources or in environments with high-intensity light.
38.Do not place the product near high-temperature objects or in environments with high temperatures.
39.Do not place the product near high-pressure objects or in environments with high pressure.
40.Do not place the product near high-speed moving objects or in environments with high-speed movement.
41.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
42.Do not place the product near high-intensity light sources or in environments with high-intensity light.
43.Do not place the product near high-temperature objects or in environments with high temperatures.
44.Do not place the product near high-pressure objects or in environments with high pressure.
45.Do not place the product near high-speed moving objects or in environments with high-speed movement.
46.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
47.Do not place the product near high-intensity light sources or in environments with high-intensity light.
48.Do not place the product near high-temperature objects or in environments with high temperatures.
49.Do not place the product near high-pressure objects or in environments with high pressure.
50.Do not place the product near high-speed moving objects or in environments with high-speed movement.
51.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
52.Do not place the product near high-intensity light sources or in environments with high-intensity light.
53.Do not place the product near high-temperature objects or in environments with high temperatures.
54.Do not place the product near high-pressure objects or in environments with high pressure.
55.Do not place the product near high-speed moving objects or in environments with high-speed movement.
56.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
57.Do not place the product near high-intensity light sources or in environments with high-intensity light.
58.Do not place the product near high-temperature objects or in environments with high temperatures.
59.Do not place the product near high-pressure objects or in environments with high pressure.
60.Do not place the product near high-speed moving objects or in environments with high-speed movement.
61.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
62.Do not place the product near high-intensity light sources or in environments with high-intensity light.
63.Do not place the product near high-temperature objects or in environments with high temperatures.
64.Do not place the product near high-pressure objects or in environments with high pressure.
65.Do not place the product near high-speed moving objects or in environments with high-speed movement.
66.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
67.Do not place the product near high-intensity light sources or in environments with high-intensity light.
68.Do not place the product near high-temperature objects or in environments with high temperatures.
69.Do not place the product near high-pressure objects or in environments with high pressure.
70.Do not place the product near high-speed moving objects or in environments with high-speed movement.
71.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
72.Do not place the product near high-intensity light sources or in environments with high-intensity light.
73.Do not place the product near high-temperature objects or in environments with high temperatures.
74.Do not place the product near high-pressure objects or in environments with high pressure.
75.Do not place the product near high-speed moving objects or in environments with high-speed movement.
76.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
77.Do not place the product near high-intensity light sources or in environments with high-intensity light.
78.Do not place the product near high-temperature objects or in environments with high temperatures.
79.Do not place the product near high-pressure objects or in environments with high pressure.
80.Do not place the product near high-speed moving objects or in environments with high-speed movement.
81.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
82.Do not place the product near high-intensity light sources or in environments with high-intensity light.
83.Do not place the product near high-temperature objects or in environments with high temperatures.
84.Do not place the product near high-pressure objects or in environments with high pressure.
85.Do not place the product near high-speed moving objects or in environments with high-speed movement.
86.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
87.Do not place the product near high-intensity light sources or in environments with high-intensity light.
88.Do not place the product near high-temperature objects or in environments with high temperatures.
89.Do not place the product near high-pressure objects or in environments with high pressure.
90.Do not place the product near high-speed moving objects or in environments with high-speed movement.
91.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
92.Do not place the product near high-intensity light sources or in environments with high-intensity light.
93.Do not place the product near high-temperature objects or in environments with high temperatures.
94.Do not place the product near high-pressure objects or in environments with high pressure.
95.Do not place the product near high-speed moving objects or in environments with high-speed movement.
96.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
97.Do not place the product near high-intensity light sources or in environments with high-intensity light.
98.Do not place the product near high-temperature objects or in environments with high temperatures.
99.Do not place the product near high-pressure objects or in environments with high pressure.
100.Do not place the product near high-speed moving objects or in environments with high-speed movement.
101.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
102.Do not place the product near high-intensity light sources or in environments with high-intensity light.
103.Do not place the product near high-temperature objects or in environments with high temperatures.
104.Do not place the product near high-pressure objects or in environments with high pressure.
105.Do not place the product near high-speed moving objects or in environments with high-speed movement.
106.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
107.Do not place the product near high-intensity light sources or in environments with high-intensity light.
108.Do not place the product near high-temperature objects or in environments with high temperatures.
109.Do not place the product near high-pressure objects or in environments with high pressure.
110.Do not place the product near high-speed moving objects or in environments with high-speed movement.
111.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
112.Do not place the product near high-intensity light sources or in environments with high-intensity light.
113.Do not place the product near high-temperature objects or in environments with high temperatures.
114.Do not place the product near high-pressure objects or in environments with high pressure.
115.Do not place the product near high-speed moving objects or in environments with high-speed movement.
116.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
117.Do not place the product near high-intensity light sources or in environments with high-intensity light.
118.Do not place the product near high-temperature objects or in environments with high temperatures.
119.Do not place the product near high-pressure objects or in environments with high pressure.
120.Do not place the product near high-speed moving objects or in environments with high-speed movement.
121.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
122.Do not place the product near high-intensity light sources or in environments with high-intensity light.
123.Do not place the product near high-temperature objects or in environments with high temperatures.
124.Do not place the product near high-pressure objects or in environments with high pressure.
125.Do not place the product near high-speed moving objects or in environments with high-speed movement.
126.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
127.Do not place the product near high-intensity light sources or in environments with high-intensity light.
128.Do not place the product near high-temperature objects or in environments with high temperatures.
129.Do not place the product near high-pressure objects or in environments with high pressure.
130.Do not place the product near high-speed moving objects or in environments with high-speed movement.
131.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
132.Do not place the product near high-intensity light sources or in environments with high-intensity light.
133.Do not place the product near high-temperature objects or in environments with high temperatures.
134.Do not place the product near high-pressure objects or in environments with high pressure.
135.Do not place the product near high-speed moving objects or in environments with high-speed movement.
136.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
137.Do not place the product near high-intensity light sources or in environments with high-intensity light.
138.Do not place the product near high-temperature objects or in environments with high temperatures.
139.Do not place the product near high-pressure objects or in environments with high pressure.
140.Do not place the product near high-speed moving objects or in environments with high-speed movement.
141.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
142.Do not place the product near high-intensity light sources or in environments with high-intensity light.
143.Do not place the product near high-temperature objects or in environments with high temperatures.
144.Do not place the product near high-pressure objects or in environments with high pressure.
145.Do not place the product near high-speed moving objects or in environments with high-speed movement.
146.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
147.Do not place the product near high-intensity light sources or in environments with high-intensity light.
148.Do not place the product near high-temperature objects or in environments with high temperatures.
149.Do not place the product near high-pressure objects or in environments with high pressure.
150.Do not place the product near high-speed moving objects or in environments with high-speed movement.
151.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
152.Do not place the product near high-intensity light sources or in environments with high-intensity light.
153.Do not place the product near high-temperature objects or in environments with high temperatures.
154.Do not place the product near high-pressure objects or in environments with high pressure.
155.Do not place the product near high-speed moving objects or in environments with high-speed movement.
156.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
157.Do not place the product near high-intensity light sources or in environments with high-intensity light.
158.Do not place the product near high-temperature objects or in environments with high temperatures.
159.Do not place the product near high-pressure objects or in environments with high pressure.
160.Do not place the product near high-speed moving objects or in environments with high-speed movement.
161.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
162.Do not place the product near high-intensity light sources or in environments with high-intensity light.
163.Do not place the product near high-temperature objects or in environments with high temperatures.
164.Do not place the product near high-pressure objects or in environments with high pressure.
165.Do not place the product near high-speed moving objects or in environments with high-speed movement.
166.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
167.Do not place the product near high-intensity light sources or in environments with high-intensity light.
168.Do not place the product near high-temperature objects or in environments with high temperatures.
169.Do not place the product near high-pressure objects or in environments with high pressure.
170.Do not place the product near high-speed moving objects or in environments with high-speed movement.
171.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
172.Do not place the product near high-intensity light sources or in environments with high-intensity light.
173.Do not place the product near high-temperature objects or in environments with high temperatures.
174.Do not place the product near high-pressure objects or in environments with high pressure.
175.Do not place the product near high-speed moving objects or in environments with high-speed movement.
176.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
177.Do not place the product near high-intensity light sources or in environments with high-intensity light.
178.Do not place the product near high-temperature objects or in environments with high temperatures.
179.Do not place the product near high-pressure objects or in environments with high pressure.
180.Do not place the product near high-speed moving objects or in environments with high-speed movement.
181.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
182.Do not place the product near high-intensity light sources or in environments with high-intensity light.
183.Do not place the product near high-temperature objects or in environments with high temperatures.
184.Do not place the product near high-pressure objects or in environments with high pressure.
185.Do not place the product near high-speed moving objects or in environments with high-speed movement.
186.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
187.Do not place the product near high-intensity light sources or in environments with high-intensity light.
188.Do not place the product near high-temperature objects or in environments with high temperatures.
189.Do not place the product near high-pressure objects or in environments with high pressure.
190.Do not place the product near high-speed moving objects or in environments with high-speed movement.
191.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
192.Do not place the product near high-intensity light sources or in environments with high-intensity light.
193.Do not place the product near high-temperature objects or in environments with high temperatures.
194.Do not place the product near high-pressure objects or in environments with high pressure.
195.Do not place the product near high-speed moving objects or in environments with high-speed movement.
196.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
197.Do not place the product near high-intensity light sources or in environments with high-intensity light.
198.Do not place the product near high-temperature objects or in environments with high temperatures.
199.Do not place the product near high-pressure objects or in environments with high pressure.
200.Do not place the product near high-speed moving objects or in environments with high-speed movement.
201.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
202.Do not place the product near high-intensity light sources or in environments with high-intensity light.
203.Do not place the product near high-temperature objects or in environments with high temperatures.
204.Do not place the product near high-pressure objects or in environments with high pressure.
205.Do not place the product near high-speed moving objects or in environments with high-speed movement.
206.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
207.Do not place the product near high-intensity light sources or in environments with high-intensity light.
208.Do not place the product near high-temperature objects or in environments with high temperatures.
209.Do not place the product near high-pressure objects or in environments with high pressure.
210.Do not place the product near high-speed moving objects or in environments with high-speed movement.
211.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
212.Do not place the product near high-intensity light sources or in environments with high-intensity light.
213.Do not place the product near high-temperature objects or in environments with high temperatures.
214.Do not place the product near high-pressure objects or in environments with high pressure.
215.Do not place the product near high-speed moving objects or in environments with high-speed movement.
216.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
217.Do not place the product near high-intensity light sources or in environments with high-intensity light.
218.Do not place the product near high-temperature objects or in environments with high temperatures.
219.Do not place the product near high-pressure objects or in environments with high pressure.
220.Do not place the product near high-speed moving objects or in environments with high-speed movement.
221.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
222.Do not place the product near high-intensity light sources or in environments with high-intensity light.
223.Do not place the product near high-temperature objects or in environments with high temperatures.
224.Do not place the product near high-pressure objects or in environments with high pressure.
225.Do not place the product near high-speed moving objects or in environments with high-speed movement.
226.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
227.Do not place the product near high-intensity light sources or in environments with high-intensity light.
228.Do not place the product near high-temperature objects or in environments with high temperatures.
229.Do not place the product near high-pressure objects or in environments with high pressure.
230.Do not place the product near high-speed moving objects or in environments with high-speed movement.
231.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
232.Do not place the product near high-intensity light sources or in environments with high-intensity light.
233.Do not place the product near high-temperature objects or in environments with high temperatures.
234.Do not place the product near high-pressure objects or in environments with high pressure.
235.Do not place the product near high-speed moving objects or in environments with high-speed movement.
236.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
237.Do not place the product near high-intensity light sources or in environments with high-intensity light.
238.Do not place the product near high-temperature objects or in environments with high temperatures.
239.Do not place the product near high-pressure objects or in environments with high pressure.
240.Do not place the product near high-speed moving objects or in environments with high-speed movement.
241.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
242.Do not place the product near high-intensity light sources or in environments with high-intensity light.
243.Do not place the product near high-temperature objects or in environments with high temperatures.
244.Do not place the product near high-pressure objects or in environments with high pressure.
245.Do not place the product near high-speed moving objects or in environments with high-speed movement.
246.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
247.Do not place the product near high-intensity light sources or in environments with high-intensity light.
248.Do not place the product near high-temperature objects or in environments with high temperatures.
249.Do not place the product near high-pressure objects or in environments with high pressure.
250.Do not place the product near high-speed moving objects or in environments with high-speed movement.
251.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
252.Do not place the product near high-intensity light sources or in environments with high-intensity light.
253.Do not place the product near high-temperature objects or in environments with high temperatures.
254.Do not place the product near high-pressure objects or in environments with high pressure.
255.Do not place the product near high-speed moving objects or in environments with high-speed movement.
256.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
257.Do not place the product near high-intensity light sources or in environments with high-intensity light.
258.Do not place the product near high-temperature objects or in environments with high temperatures.
259.Do not place the product near high-pressure objects or in environments with high pressure.
260.Do not place the product near high-speed moving objects or in environments with high-speed movement.
261.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
262.Do not place the product near high-intensity light sources or in environments with high-intensity light.
263.Do not place the product near high-temperature objects or in environments with high temperatures.
264.Do not place the product near high-pressure objects or in environments with high pressure.
265.Do not place the product near high-speed moving objects or in environments with high-speed movement.
266.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
267.Do not place the product near high-intensity light sources or in environments with high-intensity light.
268.Do not place the product near high-temperature objects or in environments with high temperatures.
269.Do not place the product near high-pressure objects or in environments with high pressure.
270.Do not place the product near high-speed moving objects or in environments with high-speed movement.
271.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
272.Do not place the product near high-intensity light sources or in environments with high-intensity light.
273.Do not place the product near high-temperature objects or in environments with high temperatures.
274.Do not place the product near high-pressure objects or in environments with high pressure.
275.Do not place the product near high-speed moving objects or in environments with high-speed movement.
276.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
277.Do not place the product near high-intensity light sources or in environments with high-intensity light.
278.Do not place the product near high-temperature objects or in environments with high temperatures.
279.Do not place the product near high-pressure objects or in environments with high pressure.
280.Do not place the product near high-speed moving objects or in environments with high-speed movement.
281.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
282.Do not place the product near high-intensity light sources or in environments with high-intensity light.
283.Do not place the product near high-temperature objects or in environments with high temperatures.
284.Do not place the product near high-pressure objects or in environments with high pressure.
285.Do not place the product near high-speed moving objects or in environments with high-speed movement.
286.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
287.Do not place the product near high-intensity light sources or in environments with high-intensity light.
288.Do not place the product near high-temperature objects or in environments with high temperatures.
289.Do not place the product near high-pressure objects or in environments with high pressure.
290.Do not place the product near high-speed moving objects or in environments with high-speed movement.
291.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
292.Do not place the product near high-intensity light sources or in environments with high-intensity light.
293.Do not place the product near high-temperature objects or in environments with high temperatures.
294.Do not place the product near high-pressure objects or in environments with high pressure.
295.Do not place the product near high-speed moving objects or in environments with high-speed movement.
296.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
297.Do not place the product near high-intensity light sources or in environments with high-intensity light.
298.Do not place the product near high-temperature objects or in environments with high temperatures.
299.Do not place the product near high-pressure objects or in environments with high pressure.
300.Do not place the product near high-speed moving objects or in environments with high-speed movement.
301.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
302.Do not place the product near high-intensity light sources or in environments with high-intensity light.
303.Do not place the product near high-temperature objects or in environments with high temperatures.
304.Do not place the product near high-pressure objects or in environments with high pressure.
305.Do not place the product near high-speed moving objects or in environments with high-speed movement.
306.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
307.Do not place the product near high-intensity light sources or in environments with high-intensity light.
308.Do not place the product near high-temperature objects or in environments with high temperatures.
309.Do not place the product near high-pressure objects or in environments with high pressure.
310.Do not place the product near high-speed moving objects or in environments with high-speed movement.
311.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
312.Do not place the product near high-intensity light sources or in environments with high-intensity light.
313.Do not place the product near high-temperature objects or in environments with high temperatures.
314.Do not place the product near high-pressure objects or in environments with high pressure.
315.Do not place the product near high-speed moving objects or in environments with high-speed movement.
316.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
317.Do not place the product near high-intensity light sources or in environments with high-intensity light.
318.Do not place the product near high-temperature objects or in environments with high temperatures.
319.Do not place the product near high-pressure objects or in environments with high pressure.
320.Do not place the product near high-speed moving objects or in environments with high-speed movement.
321.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
322.Do not place the product near high-intensity light sources or in environments with high-intensity light.
323.Do not place the product near high-temperature objects or in environments with high temperatures.
324.Do not place the product near high-pressure objects or in environments with high pressure.
325.Do not place the product near high-speed moving objects or in environments with high-speed movement.
326.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
327.Do not place the product near high-intensity light sources or in environments with high-intensity light.
328.Do not place the product near high-temperature objects or in environments with high temperatures.
329.Do not place the product near high-pressure objects or in environments with high pressure.
330.Do not place the product near high-speed moving objects or in environments with high-speed movement.
331.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
332.Do not place the product near high-intensity light sources or in environments with high-intensity light.
333.Do not place the product near high-temperature objects or in environments with high temperatures.
334.Do not place the product near high-pressure objects or in environments with high pressure.
335.Do not place the product near high-speed moving objects or in environments with high-speed movement.
336.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
337.Do not place the product near high-intensity light sources or in environments with high-intensity light.
338.Do not place the product near high-temperature objects or in environments with high temperatures.
339.Do not place the product near high-pressure objects or in environments with high pressure.
340.Do not place the product near high-speed moving objects or in environments with high-speed movement.
341.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
342.Do not place the product near high-intensity light sources or in environments with high-intensity light.
343.Do not place the product near high-temperature objects or in environments with high temperatures.
344.Do not place the product near high-pressure objects or in environments with high pressure.
345.Do not place the product near high-speed moving objects or in environments with high-speed movement.
346.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
347.Do not place the product near high-intensity light sources or in environments with high-intensity light.
348.Do not place the product near high-temperature objects or in environments with high temperatures.
349.Do not place the product near high-pressure objects or in environments with high pressure.
350.Do not place the product near high-speed moving objects or in environments with high-speed movement.
351.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
352.Do not place the product near high-intensity light sources or in environments with high-intensity light.
353.Do not place the product near high-temperature objects or in environments with high temperatures.
354.Do not place the product near high-pressure objects or in environments with high pressure.
355.Do not place the product near high-speed moving objects or in environments with high-speed movement.
356.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
357.Do not place the product near high-intensity light sources or in environments with high-intensity light.
358.Do not place the product near high-temperature objects or in environments with high temperatures.
359.Do not place the product near high-pressure objects or in environments with high pressure.
360.Do not place the product near high-speed moving objects or in environments with high-speed movement.
361.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
362.Do not place the product near high-intensity light sources or in environments with high-intensity light.
363.Do not place the product near high-temperature objects or in environments with high temperatures.
364.Do not place the product near high-pressure objects or in environments with high pressure.
365.Do not place the product near high-speed moving objects or in environments with high-speed movement.
366.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
367.Do not place the product near high-intensity light sources or in environments with high-intensity light.
368.Do not place the product near high-temperature objects or in environments with high temperatures.
369.Do not place the product near high-pressure objects or in environments with high pressure.
370.Do not place the product near high-speed moving objects or in environments with high-speed movement.
371.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
372.Do not place the product near high-intensity light sources or in environments with high-intensity light.
373.Do not place the product near high-temperature objects or in environments with high temperatures.
374.Do not place the product near high-pressure objects or in environments with high pressure.
375.Do not place the product near high-speed moving objects or in environments with high-speed movement.
376.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
377.Do not place the product near high-intensity light sources or in environments with high-intensity light.
378.Do not place the product near high-temperature objects or in environments with high temperatures.
379.Do not place the product near high-pressure objects or in environments with high pressure.
380.Do not place the product near high-speed moving objects or in environments with high-speed movement.
381.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
382.Do not place the product near high-intensity light sources or in environments with high-intensity light.
383.Do not place the product near high-temperature objects or in environments with high temperatures.
384.Do not place the product near high-pressure objects or in environments with high pressure.
385.Do not place the product near high-speed moving objects or in environments with high-speed movement.
386.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
387.Do not place the product near high-intensity light sources or in environments with high-intensity light.
388.Do not place the product near high-temperature objects or in environments with high temperatures.
389.Do not place the product near high-pressure objects or in environments with high pressure.
390.Do not place the product near high-speed moving objects or in environments with high-speed movement.
391.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
392.Do not place the product near high-intensity light sources or in environments with high-intensity light.
393.Do not place the product near high-temperature objects or in environments with high temperatures.
394.Do not place the product near high-pressure objects or in environments with high pressure.
395.Do not place the product near high-speed moving objects or in environments with high-speed movement.
396.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
397.Do not place the product near high-intensity light sources or in environments with high-intensity light.
398.Do not place the product near high-temperature objects or in environments with high temperatures.
399.Do not place the product near high-pressure objects or in environments with high pressure.
400.Do not place the product near high-speed moving objects or in environments with high-speed movement.
401.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
402.Do not place the product near high-intensity light sources or in environments with high-intensity light.
403.Do not place the product near high-temperature objects or in environments with high temperatures.
404.Do not place the product near high-pressure objects or in environments with high pressure.
405.Do not place the product near high-speed moving objects or in environments with high-speed movement.
406.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
407.Do not place the product near high-intensity light sources or in environments with high-intensity light.
408.Do not place the product near high-temperature objects or in environments with high temperatures.
409.Do not place the product near high-pressure objects or in environments with high pressure.
410.Do not place the product near high-speed moving objects or in environments with high-speed movement.
411.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
412.Do not place the product near high-intensity light sources or in environments with high-intensity light.
413.Do not place the product near high-temperature objects or in environments with high temperatures.
414.Do not place the product near high-pressure objects or in environments with high pressure.
415.Do not place the product near high-speed moving objects or in environments with high-speed movement.
416.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
417.Do not place the product near high-intensity light sources or in environments with high-intensity light.
418.Do not place the product near high-temperature objects or in environments with high temperatures.
419.Do not place the product near high-pressure objects or in environments with high pressure.
420.Do not place the product near high-speed moving objects or in environments with high-speed movement.
421.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
422.Do not place the product near high-intensity light sources or in environments with high-intensity light.
423.Do not place the product near high-temperature objects or in environments with high temperatures.
424.Do not place the product near high-pressure objects or in environments with high pressure.
425.Do not place the product near high-speed moving objects or in environments with high-speed movement.
426.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
427.Do not place the product near high-intensity light sources or in environments with high-intensity light.
428.Do not place the product near high-temperature objects or in environments with high temperatures.
429.Do not place the product near high-pressure objects or in environments with high pressure.
430.Do not place the product near high-speed moving objects or in environments with high-speed movement.
431.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
432.Do not place the product near high-intensity light sources or in environments with high-intensity light.
433.Do not place the product near high-temperature objects or in environments with high temperatures.
434.Do not place the product near high-pressure objects or in environments with high pressure.
435.Do not place the product near high-speed moving objects or in environments with high-speed movement.
436.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
437.Do not place the product near high-intensity light sources or in environments with high-intensity light.
438.Do not place the product near high-temperature objects or in environments with high temperatures.
439.Do not place the product near high-pressure objects or in environments with high pressure.
440.Do not place the product near high-speed moving objects or in environments with high-speed movement.
441.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
442.Do not place the product near high-intensity light sources or in environments with high-intensity light.
443.Do not place the product near high-temperature objects or in environments with high temperatures.
444.Do not place the product near high-pressure objects or in environments with high pressure.
445.Do not place the product near high-speed moving objects or in environments with high-speed movement.
446.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
447.Do not place the product near high-intensity light sources or in environments with high-intensity light.
448.Do not place the product near high-temperature objects or in environments with high temperatures.
449.Do not place the product near high-pressure objects or in environments with high pressure.
450.Do not place the product near high-speed moving objects or in environments with high-speed movement.
451.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
452.Do not place the product near high-intensity light sources or in environments with high-intensity light.
453.Do not place the product near high-temperature objects or in environments with high temperatures.
454.Do not place the product near high-pressure objects or in environments with high pressure.
455.Do not place the product near high-speed moving objects or in environments with high-speed movement.
456.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
457.Do not place the product near high-intensity light sources or in environments with high-intensity light.
458.Do not place the product near high-temperature objects or in environments with high temperatures.
459.Do not place the product near high-pressure objects or in environments with high pressure.
460.Do not place the product near high-speed moving objects or in environments with high-speed movement.
461.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
462.Do not place the product near high-intensity light sources or in environments with high-intensity light.
463.Do not place the product near high-temperature objects or in environments with high temperatures.
464.Do not place the product near high-pressure objects or in environments with high pressure.
465.Do not place the product near high-speed moving objects or in environments with high-speed movement.
466.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
467.Do not place the product near high-intensity light sources or in environments with high-intensity light.
468.Do not place the product near high-temperature objects or in environments with high temperatures.
469.Do not place the product near high-pressure objects or in environments with high pressure.
470.Do not place the product near high-speed moving objects or in environments with high-speed movement.
471.Do not place the product near high-frequency radiation sources or in environments with high-frequency radiation.
472.Do not place the product near high-intensity light sources or in environments with high-intensity light.
473.Do not place the product near high-temperature objects or in environments with high temperatures.
474.Do not place the product near high-pressure objects or in environments with high pressure.
475.Do not place the product near high-speed moving objects or in environments with high-speed movement.
476.Do not place the product near high-frequency radiation sources or in environments with high-
