Installation Guide

1. Check Wi-Fi connection

Please check your Wi-Fi connection before setup, device supports 2.4GHz Wi-Fi only

2. Check Mobile Device OS Version

Please make sure your phone OS version is Android 5.0 and above or IOS 10.0 and above

*Note: 1. Please plug in USB cable into adapter horizontally.
2. Please make sure your phone connected 2.4GHz Wi-Fi before using the APP.

Installation Guide

3.Download APP

Scan following QR code to download Luxhome APP

4.Power on

Plug in adapter, device successfully powers on after yellow LED light blinking

Installation Guide

1. Sign up

Click sign up and follow the instructions to complete

2. Add Device

Click Add device and follow the instruction to add device

Installation Guide

Two ways to connect Wi-Fi:

1) Connected by QR code

Click "Connected by QR code", then follow the APP's instruction.

2) Connected by Hotspot

a. Follow APP's instruction to connect your phone's Wi-Fi to designated hotspot.

Step 1: connect to the local WiFi network (WiFi 2.4ghz only) as prompted by APP, select WiFi name, input WiFi password, and click "Next".

Step 2: Click "Go To Connect", connect to the hotspot network of the device as prompted by the APP (WiFi name format: SmartLife-XXXX, password: 99999999), and click the back button on the page after the hotspot connection is successful (the position of the back button varies according to the mobile phone, generally in the upper left corner of the wi-fi connection page).

Step 3: After the device is successfully connected, click Start to add the device.

Please note following issues may lead to the failed Wi-Fi connection

- The device only support 2.4GHz, please make sure your Wi-Fi frequency is 2.4GHz.
- Incorrect Wi-Fi password.
- Your Wi-Fi connection stops unknown device to connect.

3. Successfully adding device, start your AI life.

4. Installation

Ensure your baby monitor's upright on a flat surface where you can get a complete view of baby.

This equipment complies with FCC and IC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance of 20 cm between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

This device complies with part 15 of the FCC rules and RSS-247 of Industry Canada. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help
- This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter.
