User Manual

Cleaning Brush

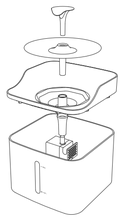
03/ Before Use

1.Disassemble the fountain and remove all components.

2.Rinse all parts except the base with clean water.

3.Do not use hot or boiling water.

4.Soak the filter in clean water for 2 minutes to remove loose carbon dust before first use.



⚠ ***WARNING:***

The base contains a built-in battery.

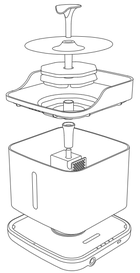
Do NOT immerse the base in water.

To clean, wipe the surface with a damp cloth only.

04/ Installation

*Install the filter into the top cover slot as shown.

*The filter is installed under the blue coarse filter pad, with the flat side of the filter facing upward.



*Insert the pump sponge into its designated slot.

·Assemble all components according to the diagram.

*Clean the filter and pump sponge weekly.

*Thoroughly clean all other parts as needed.

*After 300 hours of use, the yellow indicator light will turn on. Replace the filter set and pump sponge.

EnglishA

05/ How to Use

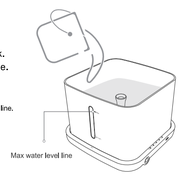
·**Add Water**

Pour drinking water into the water tank.
Do not exceed the MAX water level line.

Note:

Refill the tank when the water level reaches the MIN line.

The pump will stop operating when the red indicator light turns on.



·**Connect to Power**

Connect the USB-C power cable to the power port on the base.

Note:

When the battery is low, the red indicator light will flash.
Please connect the device to a power source promptly.

06/ Maintenance

1.Remove and clean all components except the base.
2.Wipe the base with a damp cloth only..
3.Refer to the diagrams below to disassemble and clean the water pump.

*Do not immerse or rinse the base

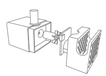
*Remove any fur, hair, or debris from the gaps.

1.Open the top cover and remove the water pump.

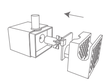
2.Remove the filter assembly.

3.Remove the pump cover.

4.Take out the magnetic impeller.



5.Clean the filter assembly, pump cover, impeller, and pump body thoroughly.



6.Reassemble all parts in the correct order after cleaning.

For purchases made through e-commerce platforms, please contact the online customer service directly with your order information.

Warranty Exclusions

1.Damage caused by force majeure events, including but not limited to fire, lightning, flooding, or earthquakes.
2.Damage caused by improper installation, use, or disassembly not inaccordance with this manual.
3.Normal wear and tear, including cosmetic damage, aging, or material consumption during regular use.
4.Any mismatch between the product model information and the actual product due to unauthorized alteration

EnglishB

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

-This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
