iOO Smart Bracelet

iOO26

Please read the instructions carefully and keep it safe.

Bind Watch

1. Download and install App

You can set up the watch through the VeryFitPro app for iOS or Android devices. The steps are shown as follows:
Notes: The hardware platform of the equipment system shall meet requirements.

iOS 8.2 version or above | Android 4.4 system or above | Support Bluetooth 4.0

Correct operation: Scan the QR code below or download the VeryFitPro App through the mobile APP store to pair with the watch.

Wrong operation: Pair the watch directly with the bluetooth in your mobile phone's settings.

2. Bind process

1.Turn on the Bluetooth and GPS on your mobile phone 2.Find the setting equipment in the APP and click the + button on the home page of the APP

Select product model: iOO26

Click "Ok" to complete binding

Notes:
- During binding process, VeryFitPro will prompt you to enable GPS and Bluetooth, and authorize VeryFitPro to get access to the GPS on you mobile phone.
- iPhones will not prompt you with any information unless you have enabled Bluetooth pairing on your iOS watch in the built-in Bluetooth in you mobile phone after binding.

Synchronous Data

In daily wear, the watch can detect all kinds of product data. The user needs to connect the watch with bluetooth on the APP before synchronous operation. The detailed operations are shown as follows:

Open the mobile APPr swipe down the page> sync prompt appears

Notes:
- Please synchronize the data at least once within 7 days to avoid data loss at the watch end.
- The Apple phone also needs to be connected to the paired watch in the Bluetooth setting interface of the mobile phone, so that the watch can be alerted. The steps are shown as follows:

Open the iOS phone > set > bluetooth > search and click pair

Instruction for Use

1. Charging schematic

Buckle the watch into the charger seat as shown in the picture. It needs to be charged to activate the watch when it is started for the first time.

2. Wear/Install

Wear | Replace the strap

Wear the wristband one finger away from the wrist bone, adjust the tightness of the wristband to a comfortable position.

Tip: Wearing too loosely may affect the accuracy of heart rate data.

Flip the switch and take out the wristband.

Waterproof: Not suitable for diving, swimming in the sea, or sauna, but can withstand accidental splashing or swimming pool or in shower (cold water) and shallow travel.

Cleaning and Maintenance

It is recommended to wear and maintain according to the following three points:
① Keep the product clean;
② Keep the product dry;
③ Do not wear it too tight;
- Do not use household cleaners to clean the watch, but use a mild soap or detergent.
- It is recommended to use alcohol to scrub stains that are not easy to remove.

Frequently Asked Questions

1. Mobile APP search for the watch failed
① It is recommended to update VeryFitPro to the latest version.
② It is recommended to close all programs, restart the mobile phone and try again.
③ Confirm whether the mobile phone system meets Android 4.4 or iOS 8.0 or above.

2. The watch received the alerts, but messages or phone calls cannot be prompted, or the smart remember function and the call reminder switch in the APP, and synchronize to the watch.
① The phone needs to be paired with the watch via Bluetooth. (Please check the column of "Synchronous Data" for details)
② You need to keep your watch connected to Bluetooth.

3. Bluetooth is often disconnected
① If the distance between the watch and the mobile phone is too far, the connection effect of more than 7m bluetooth is obviously weakened.

② Whether there is a shield between the watch and the mobile phone, the human body, wearing metal jewelry, etc., will interfere with the bluetooth connection signal.
③ Whether the bluetooth function of the mobile phone is abnormal.

4. About data backup
The data of the watch is synchronized at least once every 7 days to the mobile phone (the watch and only keeps the data of the last 7 days).

5. How to restart and restore factory settings
Shutdown operation: Watch > set > shutdown>right-key release
Restore factory settings: connect watch to APP > open APP > device model > name settings

6. Do I need to keep my bluetooth on when I wear my watch?
① For the three functions, i.e., counting steps, sleeping and alarm clock, you do not need to connect the watch to the mobile phone all the time. If you only need to wear a watch when you exercise, you can connect the watch and your mobile phone to view the data synchronously after the exercise.
② For the functions of call alert, message alert, find the phone, you need to turn on the mobile phone's Bluetooth, and maintain the connection with the mobile phone.

- More detailed questions can be answered with help and feedback in the APP.

Safety and Product Information Notes

Warning

Battery warning
Do not disassemble, bore or damage the battery. Do not throw batteries into fire or water. Do not use non-standard or non-specified battery devices. Do not use sharp objects to remove the battery.

Health Warning
If you are wearing a pacemaker or other implanted electronic devices, please consult your doctor before using the heart rate monitoring strap.
The use of the optical heart rate sensor goes green and flashes. If you suffer from epilepsy or are sensitive to blinking light sources, please consult your physician if you can wear the product.
The device tracks your daily activities through sensors. These sensors can provide you about your daily activities, such as steps, sleep, distance, heart rate and calories, but may not be completely accurate.
The device, accessories, heart rate sensors and other relevant data are designed for entertainment and fitness, not for medical purposes. They are not applicable to the diagnosis, monitoring, treatment or prevention of any medical conditions. The heart rate data is for reference only. We are not responsible for any consequences caused by any data deviation.

Cycling Warning
Please maintain good judgment at all times and ride in a safe manner. Make sure your bike and hardware are properly maintained, and all components are properly installed.

Matters Needing Attention
- Watch data needs to be kept once every 7 days to avoid data loss.
- The watch has no waterproof effect on seawater, acids and alkaline solutions, chemical reagents and other corrosive liquid. The damage or defects caused by misuse or improper use are not covered by the warranty.
- Sports mode supports up to 8 hours of exercise at a time.
- The watch has a waterproof level of 3ATM and supports shower and swimming in shallow water.
- Avoid wearing the watch too tight in daily use. Please keep the parts of the watch touching the skin dry.
- When your heart rate is measured, keep your arm still during the test.

The device meets the EU ROHS criterion.
Please refer to IEC 62321, EU ROHS Directive 2011/65/EU and revised directive.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) this device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
– Reorient or relocate the receiving antenna.
– Increase the separation between the equipment and receiver.
– Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
– Consult the dealer or an experienced radio/TV technician for help.

CAUTION:
RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE
DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS

Old electrical appliances must not be disposed of together with the residual waste, but have to be disposed of separately. The disposal at the communal collecting point via private persons is for free. The owner of old appliances is responsible to bring the appliances to these collecting points or to similar collection points. With this little personal effort, you contribute to recycle valuable raw materials and the treatment of toxic substances.
