Antenna Passive Test Report

(6G_Pifa / GNSS_Ceramic)

6nd Jan. , 2025

CONFIDENTIAL

Copyright© 2025 Arcadyan Technology Corporation. All rights reserved

Outlines

- Test Purpose and Test Item
- Test Environment
- Device Under Test
- Antenna placement
- Performance Summary
- Return Loss
- Isolation
- Antenna 3D Radiation Pattern
- Antenna 2D Radiation Pattern
- Antenna Efficiency & Peak Gain

Copyright© 2025 Arcadyan Technology Corporation. All rights reserved

Test Purpose & Test Item

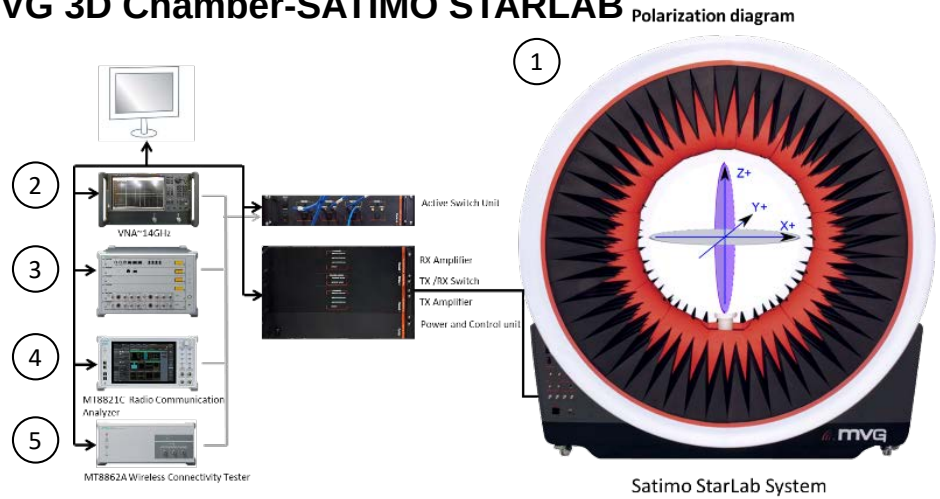
- Test Purpose: Passive testing for Efficiency / Peak Gain / Radiation Pattern
- Device Under Test: (DVT Unit)

  Model: FAP-231K

Copyright© 2025 Arcadyan Technology Corporation. All rights reserved

Testing Environment

MVG 3D Chamber-SATIMO STARLAB



ITEM	DESCRIPTION	BRAND / Part number	CALIBRATION DATE
1	StarLab System	MVG	21/Feb/2024
2	Vector Network Analyzer	Keysight 5080B	01/Jan/2024
3	5G Radio Communication Station	Anritsu MT8000A	16/Dec/2024
4	4G Radio Communication Analyzer	MT8821C	16/Dec/2024
5	Wireless Connectivity Tester	MT8862A	06/Dec/2024

Copyright© 2025 Arcadyan Technology Corporation. All rights reserved

Device Under Test

DUT inside Chamber

Manufacture	Grand-Tek Technology
Address	8F., No.233-2, Bao Ciao Rd., Hsin Dian Dist, New Taipei City, 23145 Taiwan

Brand Name	Model Name	Ant. Type	Connector
Grand-Tek	1034G00000500	PIFA	MHF I
Grand-Tek	1034G00000510	PIFA	MHF I
Grand-Tek	1033G00000220	PIFA	MHF I
Grand-Tek	103CG00000560	Alford Loop	MHF I
Grand-Tek	1039G00000050	PIFA	MHF I
Grand-Tek	1031G00000330	PATCH	MHF I

Total Antenna Quantity: 6

Test Setup:

A. Connect testing cable to 1 antenna port.

B. Connect terminator on the other ports

Follow sequence for the other ports.
