Description of the operation modes

The operation modes described in this paragraph constitute a functionality of the sample under test for itself. Every operation mode takes a failure criteria for the immunity test that they were applying to it and a monitoring to guarantee performance of the same ones.

The operation modes used by the samples to which the present report refers, are shown in the following table:

Id	Description
OM/01	EUT ON. Radio silence mode. Power Supply: Internal battery (4 Vdc).
OM/02	EUT ON. Charging mode. Power Supply: 5 Vdc via USB

Test standards version applied
