Phone Output:5W/7.5W/10W/15W(Max)

Earbuds Output: 3.0W(Max)

Input Port: Type-C

Watch Output: 2.5W(Max)

ProductSize:205.04*141.9*86.94mm

PACKING LIST

1. Multifunction Wireless Charger X 1

2. User manual X 1

3. C-To-C quick charging cable X 1

FAQ

1. If you're experiencing interrupted or slow charging, check the following:

(1) The back of your phone should not have any metal, plug sockets, or credit cards.

(2) Put the phone in the center of the charging surface (this lets the charging coil in your phone line up with the one inside the wireless charger).

(3) Phone cases should be no thicker than 5 mm for effective charging.

(4) Check whether the adapter is QC 3.0 fast charger.

2. If you're failing to charge your device, please try out the following:

(1) Please reset your cell phone and test with other Type-C charging cable.

(2) Please check whether the indicator turns on or not.

(3) Please check the Adapter is QC3.0 Quick Charger or not.

(4) Please check your Phone case thickness(<=5mm), Metal ring or Magnetic Pad will not be available.

3. If you're using the recommended wireless charger with the QC3.0 Adapter and have removed any potential charging obstructions, but are still experiencing issues, try this:

(1) Replacing the cable connecting your wireless charger.

(2) Rebooting your phone.

(3) Unplug the adapter and reset.

英语

4. If the LED light flashes and the wireless charging stand cannot charge your device, how can I deal with this problem?

1. Before using this wireless charger, please make sure that your device supports Qi wireless charging function.

2. Check whether the 3.0 adapter is used for charging.

3. Check whether there are metal foreign matters in the shell of your equipment. Magnetic and metal accessories will flash the LED and prevent charging.

5. Charging slow.

Charging efficiency depends on the receiving power of your devices, and do not keep those apps keep running during charging.

6. The phone is charging intermittently, or the indicator light flashes.

If the charging current is not enough, please use a adapter with sufficient power 9V/3A or 12V/2.4A or 15V/3A.

7. Charging fever.

It is normal for the receiving coil or transmitter board to generate heat during wireless charging. If the wireless charger is too hot, please take your phone off it, when the wireless charger is cooled down, please charge it again.

8. The charger does not work.

Do not put metal debris or magnetic cards on the charging area. If the product does not work due to overheating, please take off the phone and charge it again when it is cooled down.

9. If there are another problems, please contact our after-sales for solution.
