Plug-in charging x 1 2. User manual x 1 3. Type-C quick charging cable x 1 FAQ 1. If you're experiencing interrupted or slow charging, check the following: (1) The back of your phone should not have any metal, pop sockets, or credit cards. (2) Put the phone in the center of the charging surface (first lies the charging coil in your phone line up with the one inside the wireless charger). (3) Phone cases should be no thicker than 1.5mm for effective charging. (4) Check whether the adapter is QC 3.0 fast charger. 2. If you're failing to charge your device, please try out the following: (1) Please restart your cell phone and test with other Type-C charging cables. (2) Please check whether the indicator turns on or not. (3) Please check the Adapter is QC3.0 Quick Charger (Input 5V/2A) or not. 3. Charging slow. Charging efficiency depends on the receiving power of your devices, and do not keep those apps keep running during charging. 4. The phone is charging intermittently, or the indicator light flashes. If the charging current is not enough, please use a adapter with sufficient power 5V/2A or 12V/2A above. 5. Charging fever. It is normal for the receiving coil or transmitter board to generate heat during wireless charging. If the wireless charger is too hot, please take your phone off it, when the wireless charger is cooled down, please charge it again. 6. The charger does not work. Do not put metal items or magnetic cards on the charging area. If the product does not work due to overheating, please take off the phone and charge it again when it is cooled down. 7. For iPhone 13 / 12 series phone can not be charging? 1. If you are using iPhone 13 / 12 series, but you can't charge it, please try restarting your phone and charging again. 2. If your iPhone cannot be charged, it may be due to the iOS Version. Please try restarting your phone to solve this problem. 8. If there are another problems, please contact our after-sales for solution. TIPS 1. This 3-in-1 wireless charging station only supports Apple watch S7 / SE / SE / S6 / S5 / S4 / S3 / SE. (Note: Apple watch series 1 is not supported). 2. Do not charge the charging station of Apple products from the computer USB interface or other power converters. 3. When charging, place the enabled device in the center of each wireless charging area. 4. Make sure your device is in the middle of the wireless charging area. 5. The phone small of iWatch and AirPods may cause abnormal charging. It is best to take it off before charging. WARNING 1. Avoid using the product at places that are wet, humid or have high temperature. 2. Avoid dropping the product from high places. 3. Do not disassemble the product by yourselves. Please contact us if necessary. 4. Do not clean the product unless the coil is powered off. 5. It is recommended to use 18W or above adapter to charge 3 smart devices at the same time. FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.
