These documents reveal detailed technical and design information that is protected by DIEHL METERING as confidential and proprietary trade secrets. This information has been disclosed to those required to maintain its confidentiality and is not customarily disclosed to the public even after commercial release of a device. As a result, disclosure of this information by the Commission would harm DIEHL METERING by giving competitors an unfair advantage even after commercial release of the device.

II. Short Term Confidentiality

In addition to the above mentioned documents, pursuant to Public Notice DA 04-1705 of the Commission's policy and KDB 726920 D01, in order to comply with the marketing regulations in 47 CFR §2.803 and the importation rules in 47 CFR §2.1204, while ensuring that business sensitive information remains confidential until the actual marketing of newly authorized devices, DIEHL METERING requests that the Commission withholds the following documents from public viewing for one hundred eighty (180) days after the date the grant of equipment authorization is issued:

Exhibit Type	File Name
External Photos	ExtPho
Internal Photos	IntPho
Test setup photos	TSup
User Manual	20250414_User_Guide_IZAR_OH_BT_3 IZAR OH BT 3_Web - 14.04.2025

These documents reveal technical and design information that has not been publicly disclosed in marketing materials and is protected by DIEHL METERING as confidential and proprietary trade secrets. This information has been disclosed to those required to maintain its confidentiality and is not customarily disclosed publicly prior to the commercial release of the device. As a result, disclosure of this information by the Commission prior to commercial release would harm DIEHL METERING by giving competitors an unfair advantage even after commercial release of the device. DIEHL METERING believes the period of confidentiality requested is necessary to protect the information until the commercial release of a device.

It is our understanding that measurement test reports and FCC ID label format cannot be granted as confidential documents and this information will be available for public review once the grant of equipment authorization is issued.

The applicant understands that pursuant to Section 0.457 of the Rules, disclosure of this application and all accompanying documentation will not be made before the date of the Grant for this application.
