FAQ

1. If you experience interrupted or slow charging, check the following:
(1) The back of your phone could not have any metal, pop sockets, or metal cases.
(2) Put the phone in the center of the charging surface after the two charging pins in your phone line up with the one inside the wireless charger.
(3) The wireless charging will not work properly if the phone is covered by a thick case. (Please cases should be no thicker than 3mm for wireless charging)
(4) Check whether the adapter is QC2.0/QC3.0 fast charger.
2. If you're failing to charge your device, please try out the following:
(1) Please restart your cell phone and test with other USB cables.
(2) Please check whether the indicator light is on or not.
(3) Please check the adapter is QC2.0/QC3.0 or not. Please original adapter does not meet the wireless charger.
(4) Please check your Phone case (not too thick), metal rings or magnetic bands will not be suitable.
3. If you're using the wireless charger with the recommended QC2.0/QC3.0 adapter and have removed any potential charging obstructions, but are still experiencing issues, try:
(1) Replugging the cable connecting the wireless charger.
(2) Replugging your phone.
(3) Unplugging the adapter and restarting.
4. Wireless charger's compatible mobile phone models, TWS models and watch models:

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radiofrequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The FCC certification of this device refers to RF exposure testing performed in typical operating conditions, where a person is no closer than 20 centimeters from the device surface at all times, except for non-repetitive patterns with transient time intervals in the order of a second. Only in the stated conditions, the device is shown to fully comply with the FCC RF Exposure requirements of KDB 447498.
