Components:

Platforms available for the product:

1. Mobile phone: for Type C interface Android phone plug and play
2. Desk top PC/ Laptop NB: adapter required (USB3.0→Type C)
3. Play Station 4: Adapter required (USB3.0→Type C)

Product Description:

1. For mobile e-sports games, it is recommended to enable mobile Wi-Fi option.
2. This product is a 2.4G wireless product. Try to avoid using it in a complex environment in this frequency band, so as to avoid interference, you can get a better product experience.
3. Because the products are set as esports and mobile game special products, the use distance is set to be within 5 meters, which is the best experience distance.
4. Both ears are equipped with volume buttons to adjust the volume function.
5. The effect of heavy bass is the best when the earphones are worn. Only using one ear may have some incomplete functions, and it is not recommended normal operation.
6. When the headphone battery capacity is lower than 30%, there will be a low power warning sound. Please charge it as soon as possible to avoid affecting the use

Matters needing attention about earphones:

Keep away from the fire

Failure to do so may result in product distortion or malfunction

FCC Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
