For more information you can go to www.vozzmobile.com Additional information on electromagnetic fields and Public health is available at the following website: http://www.who.int/peh-emf. Your phone is equipped with a built-in antenna. For optimal operation, avoid touching or damaging it. Since mobile devices offer a wide range of functions, can be used in other positions that do not be next to his ear. In such circumstances the device will be in accordance with the guidelines when used with a cable of USB data or a headset. If you are using another accessory make sure that any product that is using is free of any metal and to place the phone at least 1.0 cm away from your body.

VOZZ Mobile

FCC Warning:

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device
may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications or change to this equipment. Such modifications or change could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue.
Device types S1 (FCC ID: 2AOQSVOZZS1) has also been tested against this SAR limit. The highest reported SAR values for head, body-worn accessory are 0.53 W/kg, 0.68 W/kg respectively.

The Max simultaneous SAR is 0.70W/kg. This device was tested for typical body-worn operations with the back of the handset kept 10mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 10mm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.
The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
