- Do not leave device in direct sunlight or damp environments for long periods of time.

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- This device may not cause harmful interference.
- This device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user’s authority to operate this equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

ISEDC WARNING:

This device complies with Innovation, Science and Economic Development Canada licence-exempt RSS standard (s).

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Cet appareil satisfait aux prescriptions de la Partie 15 des règles FCC. L'utilisation de l'appareil est assujettie aux conditions suivantes: 1) Cet appareil ne doit pas provoquer d'interférence néfaste, et 2) Cet appareil doit accepter toute interférence reçue, ceci incluant des interférences pouvant susciter un fonctionnement indésirable.

For this device, SAR tests are conducted using standard operating positions accepted by the FCC/ISEDC with thedevice transmitting at its highest certified power level in all tested frequency bands, although the SAR is determinedat the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value.

Before a new model device is a available for sale to the public,it must be tested and certified to the FCC that it does notexceed the exposure limit established by the FCC/ISEDC, Tests for each device are performed in positions and locations(e.g. at the ear and worn on the body) as required by the FCC/ISEDC.

For body worn operation, this model device has been tested and meets the FCC/ISEDC RF exposureguidelines when used with an accessory designated for this product or when used with an accessory thatContains no metal and that positions the handset a minimum of 5 mm from the body.

Non-compliance with the above restrictions may result in violation of RF exposure guidelines
