FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

Operation and indicator description

LED smart working indicator status

Power on	Press the "On/Off" button	The blue indicator flashes slowly and enters the Bluetooth searching state.
Connection	Connected	The blue indicator is on for 2 seconds, and powers off
	Not connected	The blue indicator flashes slowly.
Power off	Press and hold the "On/Off" button for 5s	The blue indicator flashes twice.
Electricity	When the battery is below 20%	The red indicator flashes quickly.
	When it starts charging	The red indicator flashes slowly.
	When charged fully	The red indicator is steady on, and after the usb is removed, the red indicator is off.

- Note:
- The "On"button and the "Off" button are the same button.
- Only one color indicator is allowed to be lit at the same time. When the red indicator and the blue indicator conflict, the blue indicator is preferred.
- When the blue indicator flashes slowly for one minute, and Bluetooth is not connected, it will automatically shut down.
- Quick flash: 0.3 s interval
- Slow flash: Loop 2.0 s

Common Problem

1.The blue and red lights flash continuously

The blue light flashes slowly, so it is searching for Bluetooth status.
The red light flashes quickly, the power is less than 10%.

2.Blue light flashes but cannot connect to APP

Please ensure that Bluetooth has been opened.
If you do not connect to APP, please quit first and then enter APP.

3.Flashback problem

Exit the APP first, then enter the APP.

4.Why can't connect to the game?

Please ensure that Bluetooth has been opened.
Make sure the floating icon is displayed, and if it is bright, it is connected
If there is no floating ball, it is a non-game hall version.
It may be that the touchpad is in a low battery state, please charge it in time.
