Introduction

Touchpad

The touchpad supports multi-finger functions. A single finger click as left mouse function, two-finger click as the right mouse function, double finger drag as the rolling screen. Easily browse the internet and play games.

Connecting the receiver

Slide the receiver out from the side of keyboard,and insert to the devices with a standard USB interface.Once connected,slide the power switch to the "ON"position located on the left side of the unit to establish the connection.

Auto sleep and wake feature

The keyboard also features an auto sleep and auto wake mode. The keyboard will automatically turn onto the sleep mode following 3 minutes of inactivity . During the sleep mode,the user can wake the unit up by pressing any key.The 2.4GHz receiver and keyboard's RF indicator will continue to flash and will not power down.

Switching off the keyboard after use

After you're finished using it, please push the switch to the OFF position, which will turn off the power of the keyboard.The USB receiver should be plugged out from the PC and then inserted back in the keyboard so it is being kept safely.

Charging the battery(Removable lithium battery BL-5B)

The device with built-in lithium-ion battery,please use only approved data lines and chargers.
Fully charge the unit before operating for the first time .This device can be used when charging,but will extend the charging time;
When the battery is low,the low-voltage light will flash to warn the user.The unit will automatically turn off if the battery has been depleted.

Appendix

Technical Operation Specification

- Measurements(L*W*H):151x97x18mm
- Weight(grams): 112g
- Operational Range: up to 10 meters
- Transmit power: +5db Max
- Operation voltage:3.7V
- Operation current:8~30mA
- Charging current:<200mA
- Sleep current:<15vM
- Battery capacity: 300 mAh
- Battery optional BL-5C or AAA battery

Applicable systems

- Windows 2000
- Windows XP
- Windows Vista,Windows CE,Windows 7
- Linux(Debian-3.1,Redhat-9.0 Ubuntu-8.10 Fedora-7.0 tested)

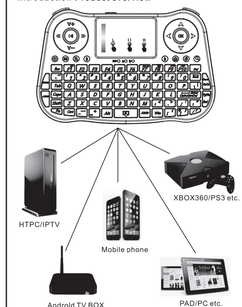
Introduction Product overview



FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party.

Responsible for compliance could void the user’s authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired operation.
