Power Supply

Power Adaptor

1. This product can be plugged into the power port on the back of the projector using a DC 12V/1.5A power adapter, and the other end into a wall socket. Make sure the power output of the wall outlet matches the power required by the adapter.

2. Type-c interface: supports PD, QC, AFC fast charging protocol chargers/charging treasures with output of 12V/1.67A or more, and powers the projector (Note: It is recommended that the power interface and the type-c interface do not supply power to the projector at the same time!)

3. The Type-c interface of this product supports mobile power supply 12V/1.67A and can be used outdoors. If the user does not have a DC 12V/1.5A adapter, as long as it is a mobile phone power adapter that supports the fast charging protocol supported in point 2 above, choose a matching one The Type-c data cable is connected to the Type-c interface of the projector, and it can be used normally. (Note: If you use A port to TYPE-C data cable or C port to TYPE-C data cable, you need the corresponding power interface.)

Note: If not using the unit for a longer period of time, unplug the adaptor from the wall outlet and from the unit.

Basic Functions

1. Power the unit as described above.
2. The unit is now in standby mode.
3. To switch the unit on, press the button  once. The LED light will turn to Green. The unit will switch on to the mode last selected.
4. To switch the unit off into standby mode, press button .

Volume Control

User Information

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
