Bluetooth

Specification

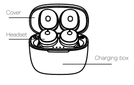
Headset specification:

Product name: wireless Bluetooth headset
Bluetooth version: **5.0 Single mode**
Chip: RTL8763BFR
Call duration: 5~6 hours
Music playback duration: 5~6 hours
Battery: 3.7V×50mA lithium battery
Charging period: 1~2 hours

Working temperature: 10 55

Charging box specification:

Input: 5V±0.25V/1A
Output: 5V±0.25V/50mA
Battery capacity: 500mA



Operating Method

Automatic power-on and automatic matching: take out the two headsets from the charging box, the LED light will flash (blue or red) for 2 seconds, then it will imply that "the headsets are powered on and being connected", and the right headset will make a drumming sound for three times, suggesting that the left and right headsets are successfully matched. The indicating light of the right headset flashes, implying that a Bluetooth device needs to be connected.

Phone matching: enable the Bluetooth function in your phone, and the model name "V2pro" will appear in the available device list. Press connect, and your phone will show that it is connected, and the right headset will say "the device has been connected", meaning that your phone is successfully matched.

Previous/next: double-click the button on the right headset (R), and it will play the next song; double-click the button on the left headset, and it will play the previous song.

Volume +/-: press the button on the right headset for 3 consecutive times to maximize the volume; press the button on the left headset for 3 consecutive times to minimize the volume; or you can adjust the volume directly on your phone.

Answer/hang up: press the button on the left/right headset to answer the phone and press it again to hang up when you finish the call.

Enable Siri: long-press the button on the left/right headset for 2~3 seconds and release it, voice control of your phone will be enabled, press the button to disable Siri.

Power-off and suspension: put the headsets into the charging box and close the upper cover of it, and the headsets will be disconnected from your phone and switched to the charging mode; open the upper cover of the charging box, and the headsets will be automatically matched and connected with your phone again within 2~4 seconds. To power off the headsets, directly press the button on the right headsets for 4~5 seconds; when the red light goes on and off, the headsets are powered off.

Automatic restoration: the headsets are automatically matched with the phone which was used when the headsets were taken out from the charging box last time.

Factory reset: the two headsets were matched when being packed, however, they might be unmatched due to some misoperations; in this case, rematch time as per the following steps.
Turn off the two headsets, press their buttons at the same time, and you will see that the blue lights of the two headsets flash → the red and blue lights of the right headset flash slowly and alternatively → the red and blue lights of the right headset flash quickly and alternatively → the lights go off. At this time, the two headsets have been restored to factory settings. Turn the headsets on before using them. The whole process will take about 10~14 seconds.

Single-headsetusage mode: when you take out one of the headsets from the charging box (while keeping the other one powered off or in charging mode), the headset's blue light goes on and then its red and blue lights flash alternatively, meaning that it is to be matched. Enable the Bluetooth search function on your device, and the search list will show the Bluetooth headset name "V2pro". Click to connect it.
To use the two headsets after only one of them is used the last time, restore both of them to the factory settings.

Charging and Index

- **Automatic headset charging:**
insert the headsets into the charging box, and their red lights will go on, indicating that they are being charged; when their blue lights go on, they are fully charged.

- When the headsets are charged in thecharging box, the 4 blue lights of the charging box go on, indicating that it's full; when only one of the blue lightsof the charging box goes on, the charging box is out of power, reminding you of charging it promptly.

Notice:

1. Do not drop, impact, scrub, twist, flap and grind the headsets or put them into water.
2. Do not put the headsets at extremely high temperature.
3. Do not expose the headsets to humid environments.

Common Problems and Solutions

Phenomenon	Cause	Solution
The headsets cannot be automatically powered on/off	They are out of power	Charge them for 1~2 hours
No hint is given after the headsets	They are not properly matched	Match them again
Sounds can be heard from the headsets but their red lights are on	The red lights go on in case of low power	Charge the headsets
The lights do not go on when the headsets are charged	The power supply does not output power	Check if the power supply is connected
Echoes can be heard during a phone call	The volume is too high or your environment is too noisy	Lower the volume or change the environment
Noises are generated when you speak	There's an environmental interference or you are too far away from your device	Change the environment or get close to your device
The volume is too low	The headsets are not worn correctly	Adjust your way of wearing them
The music cannot be heard	Your phone does not support this function	Your phone does not support this function

Warning Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

The device is too small to label ID number, so, the ID number is adhered in the charger case.

Model:V3pro

FCC ID: 2AR3G-V3PRO

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2)this device must accept any interference received, including interference that may causeundesired operation.
