PRODUCT INTRODUCTION

Proprietary Fieldsheer® powered by Mobile Warming® technology is specially engineered for cold weather conditions. Mobile Warming®'s comprehensive heating technology keeps you warm and comfortable in all weather conditions. Our exclusive heating technology utilizes ultra-fine fiber elements powered by lightweight, rechargeable, Lithium-Ion batteries. As heat builds, Mobile Warming® technology reflects and directs heat back towards the body ensuring that you stay warm. The combination of unique materials, construction techniques, and innovative design results in the most advanced heated gear available.

Refer to your garment Premium Heated Gear label for care details

- Disconnect battery pack from the garment(s)
- Machine wash delicate cycle in warm water
- Tumble dry with low heat
- Do not wring
- Do not dry clean
- Do not bleach or use other harsh chemicals
- Do not Iron
- Recommend hanging up if storing for extended period of time

Mobile Warming®'s powerful lithium-ion battery technology was designed and engineered to provide you with safe and reliable power, allowing you to be warm and comfortable. Please follow the instructions below to optimize your lithium-ion battery usage.

USB CHARGING BATTERY

To charge your battery, use the supplied micro-USB cable. Connect the USB end to your computer or any USB powered source like the USB wall adaptor included with your phone or tablet.

Micro-USB Cable

CHARGING 12V BATTERY

ASA16U17

 Do not use battery if you notice a change of shape (lumps), over-heating when charging or if rust or corrosion on the battery connectors is found. Use only with the charging adaptor provided with your product to charge your battery.

Never dispose of batteries in the garbage. Disposal of batteries in the garbage is unlawful under state and federal environmental laws and regulations. Always take used batteries to your local battery recycling center.

This product contains chemicals known to the state of California to cause cancer and birth defects or other reproductive harm

IMPORTANT: This product is intended to be used by an adult and therefore is the sole responsibility of the Purchaser to follow detailed instructions and warnings. The Purchaser agrees to indemnify Manufacturer for any unintended use/misuse.

- Avoid running Lithium-Ion batteries completely dead. This will result in performance problems and reduced battery life.
- Lithium-Ion batteries by nature have diminished capacity output in extremely cold temperatures. We recommend keeping batteries inside the garment to maximize battery performance.
- Do not allow Mobile Warming battery(s) to come in contact with water or liquids. If water or other liquids enter the battery interior, immediately unplug the battery from the garment.
- Do not use if you feel the battery is compromised.
- Avoid allowing your Micro-USB or DC jack ports from being contaminated with debris that could interfere with operations. Suggest to check ports before each use.

BATTERY STORAGE

- Disconnect battery from garment.
- Power off battery(s) if applicable.
- Fully charge battery(s) prior to storage
- Keep battery(s) in cool dry place out of direct sunlight
- Charge every 6 months to maintain battery life. It is important to keep your battery charged
- Do not store Mobile Warming batteries below - 4 °F (- 20 °C)

7. MW CONNECT™ APP

Allows you to control your Bluetooth® enabled garment with your mobile device.

This product controls the operation of the product through the APP on the mobile phone.

1. The phone downloads the connection software.

2-1. If you are using an iPhone, search for MW connect in the appstore and download the software: After downloading the software, open the software and the dialog box "MW CONNECT™" pops up. If you want to use Bluetooth, click the OK option in the dialog box, And then click Finish

2-2. For Android, please download and install the installation package provided. After downloading, enter the App interface and click "Allow Access to Location Services" button. In the new dialog box, click "Allow in use only".

3. Find a black cable with DC connector in the battery pocket and plug it into the allotted battery DC connector. Press the battery switch button. At this time, you will see the Bluetooth controller light up and the clothing will heat up.

4. Enter the "MW CONNECT" App on the mobile phone, click the button in the upper left corner of the App, click ADD/VIEW

5. a list of available GARMENTS will be listed in the search interface. Select the GARMENT(S) in the list and rename each. Click OK after renaming. Select FINISH to complete the bluetooth pairing process

6. on the MW Connect(tm) Home screen, Battery level is shown on the upper left and Heat Level is shown on the upper right. GARMENT being controlled will be shown in the middle.

To control heat level, select one of the colored buttons on the bottom of the screen. RED is 100%, Orange is 75%, Green is 50% and Blue is 25%

7. Press the clothes icon on the interface for 3-5 seconds, and a shutdown interface will pop up. Click OK, and the heating device will shut down. Meanwhile, the mobile App can no longer control the Bluetooth heating device unless it is connected again according to the steps

HEAT RATINGS

NOTE: Heat and time are estimated and may vary depending on conditions. Exposing battery to extreme temperatures may impact these estimates.

FCC WARNING

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance

with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement.
