FIELD SHEER®

USER MANUAL

MANUEL D'UTILISATION
MANUAL DE INSTRUCCIONES

Thank you for purchasing our battery powered Premium Heated gear. Your garment is designed to deliver heat on demand.

To ensure optimal performance of your Heated gear. Please carefully read through this user manual prior to using the garment.

Stay up to date with the latest product information by registering your garment at ***fieldsheer.com/product-registration***. You can also find other great Fieldsheer products at fieldsheer.com

The function of wireless remote control in this product is to use wireless remote to connect heating products for temperature control and wireless adjustment.

Proprietary Fieldsheer® powered by Mobile Warming® technology is specially engineered for cold weather conditions. Mobile Warming®'s comprehensive heating technology keeps you warm and comfortable in all weather conditions. Our exclusive heating technology utilizes ultra-fine fiber elements powered by lightweight, rechargeable, Lithium-Ion batteries. As heat builds, Mobile Warming® technology reflects and directs heat back towards the body ensuring that you stay warm. The combination of unique materials, construction techniques, and innovative design results in the most advanced heated gear available.

Mobile Warming®'s powerful lithium-ion battery technology was designed and engineered to provide you with safe and reliable power, allowing you to be warm and comfortable. Please follow the instructions below to optimize your lithium-ion battery usage.

USB CHARGING BATTERY

To charge your battery, use the supplied micro-USB cable. Connect the USB end to your computer or any USB powered source like the USB wall adaptor included with your phone or tablet.

HEATED SOCKS

HEATED INSOLE

Do not use battery if you notice a change of shape (lumps), over-heating when charging or if rust or corrosion on the battery connectors is found. Use only with the charging adaptor provided with your product to charge your battery.

Never dispose of batteries in the garbage. Disposal of batteries in the garbage is unlawful under state and federal environmental laws and regulations. Always take used batteries to your local battery-recycling center. This product contains chemicals known to the state of California to cause cancer and birth defects or other reproductive harm

IMPORTANT: This product is intended to be used by an adult and therefore it is sole responsibility of purchaser to follow detailed instructions and warnings. The Purchaser agrees to indemnify Manufacturer for any unintended use/misuse.

Avoid running Lithium-Ion batteries completely dead. This will result in performance problems and reduced battery life.

• Avoid allowing your Micro-USB or DC Jack ports from being contaminated with debris that could interfere with operation. Suggest to check ports before each use.

• Lithium-Ion batteries by nature have diminished capacity output in extremely cold temperatures. We recommend keeping batteries inside the garment to maximize battery performance.

• Do not allow Mobile Warming battery(s) to come in contact with water or liquids. If water or other liquids enter the battery interior, immediately unplug the battery from the garment. Do not use if you feel the battery is compromised.

BATTERY STORAGE

- Disconnect battery from garment.
- Power off battery(s) if applicable.
- Fully charge battery(s) prior to storage
- Keep battery(s) in cool dry place out of direct sunlight
- Charge every 6 months to maintain battery life. It is important to keep your battery charged

LIMITED ONE YEAR WARRANTY

Fieldsheer Apparel Technologies warrants to the original purchaser of this Fieldsheer® branded product (the“Product”) that the construction, electrical heating components and battery of the Product shall be free from factory defect in materials and workmanship for a period one (1) year from the date of original purchase when the Product is purchased from an authorized reseller and used as recommended by Fieldsheer Apparel Technologies. During the warranty period, Fieldsheer Apparel Technologies will, at its option and at no additional charge to you, repair or replace the Product, or any part of the Product, if it becomes defective, malfunctions, or otherwise fails to conform with this Limited One Year Warranty.

LEGAL

Any damage caused to any Fieldsheer® products by misuse, abuse, improper care, accident, normal wear and tear, or the natural breakdown of materials over an extended period of time and use are not covered in this warranty. Any alterations or repairs (attempted or otherwise) performed on any Fieldsheer® products voids any and all warranties offered by Fieldsheer® for that particular item.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement.
