

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the EUT housing and board. The housing is a blue plastic rectangular box. The board is a green printed circuit board (PCB) with gold-colored components and traces. The board is placed next to a black ruler with white markings, showing dimensions in millimeters. The ruler is oriented vertically, with the 0 mark at the top and the 100 mark at the bottom. The board is positioned horizontally, with its left edge aligned with the 0 mark of the ruler. The board's width is approximately 60 mm, and its height is approximately 100 mm. The board features a gold-colored connector on the left side and a gold-colored component on the right side.
Solder Board-Component View 1	 A photograph showing the solder board-component view. The board is a green printed circuit board (PCB) with gold-colored components and traces. The board is placed next to a black ruler with white markings, showing dimensions in millimeters. The ruler is oriented vertically, with the 0 mark at the top and the 100 mark at the bottom. The board is positioned horizontally, with its left edge aligned with the 0 mark of the ruler. The board's width is approximately 60 mm, and its height is approximately 100 mm. The board features a gold-colored connector on the left side and a gold-colored component on the right side. The board is soldered to a component, which is a gold-colored component with two circular openings.

Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) component. The component is rectangular with a complex pattern of gold-colored solder pads and traces. It is positioned on a blue textured surface. A black ruler with white markings is placed to the left and bottom of the component for scale. The ruler shows measurements in millimeters, with the component's width being approximately 40 mm and its height approximately 30 mm.
Solder Board-Component View 3	 A photograph of a small, circular, silver-colored component, likely a coin cell battery. The component has the text "CR 2477N", "renata", and "SWISS 3V MADE" printed on it. It is positioned on a blue textured surface. A black ruler with white markings is placed to the left and bottom of the component for scale. The ruler shows measurements in millimeters, with the component's diameter being approximately 10 mm.

Solder Board-Component View 4	 A photograph showing a circular solder component on a blue textured surface. A black ruler with white markings is placed below the component, showing measurements in millimeters. The component is positioned between the 10 mm and 20 mm marks on the ruler.
Antenna View	 A photograph showing a green printed circuit board (PCB) with various electronic components. A red box labeled "BLE Antenna" points to a specific component on the board. A black ruler with white markings is placed below the board, showing measurements in millimeters. The board is positioned between the 10 mm and 20 mm marks on the ruler.
