

User Guide

English

Step 1: Slide the switch to ON and the keyboard will enter pairing mode automatically at first use. Or you can press  +  simultaneously for 3 seconds and then the keyboard will enter pairing mode with flashing blue indicator light.

Step 2: On your device, toggle Bluetooth to ON and tap the name of the keyboard in the list for pairing.

Step 3: The blue LED light will stay on once the keyboard is paired with your device successfully.

Note:

1. If some keys cannot work properly, the keyboard OS might not match the OS of your device. To switch to the right system, please press the  +  or  +  key. Once the system is switched, the blue light will flash 3 times.
2. If the Bluetooth connection is unsuccessful, please delete the pairing history from your device. Then press and hold  +  for 5s to restore factory defaults, and repeat the pairing steps to pair your device with the keyboard.
3. The steady blue LED light means the Bluetooth connection is successful; the flashing blue light means the keyboard is pairing with your device; if it is off, that means the Bluetooth connection fails or the keyboard is not switched on.
4. It is not recommended to charge the keyboard with a fast charger.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
