Frequently asked questions

If the **BSTBT005** Wireless Bluetooth Headset does not turn on?
● Check that your **BSTBT005** Wireless Bluetooth Headset has enough battery power.
● If your computer's own battery is exhausted, your computer's USB port will not be able to charge the **BSTBT005**'s battery. Try charging the **BSTBT005**'s battery with a 5V (1A or 2A) USB charger. The charging time is about 2 -3 hours.

What if there is no sound playing music headphones?
● Check if the playing device and the Bluetooth headset are connected effectively. If the audio device is not connected properly, please reconnect and adjust the volume of the mobile phone and Bluetooth headset to the appropriate volume level.
● Please confirm whether the Bluetooth of the mobile phone is in "Device Visible Mode". If the pairing is not performed for a long time, the Bluetooth pairing function will be automatically turned off. Please turn Bluetooth back on to "Device Visible Mode". If the phone program error occurs, please restart the phone. If the Bluetooth headset program is wrong, please restart the Bluetooth headset.

FCC statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Caution: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

--Reorient or relocate the receiving antenna.

--Increase the separation between the equipment and receiver.

--Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

--Consult the dealer or an experienced radio/TV technician for help.
