

60X80MM

USER MANUAL

MODEL:JJT-C09PLUS
5 in 1 wireless charger

Product Parameters

Charging Method: Electromagnetic induction
Input: 15V/3A
Phone Output: 5W 7.5W 10W 15W 25W
AirPods Output: 5W
Apple&Samsung Watch Output: 1-3W
Bluetooth Speaker Output: 5W
Charging Distance: <5mm
Charging Efficiency: <80%
Standby Power Consumption: <1W
Maximum Total Output: 30W

Instructions

1. Lighting method		The indicator light is red and blue							
LED light color	Power on	Standby	Phone charging	Earphone charging	Foreign object detection	Overvoltage	Overcurrent	Temperature too high	
Red light	Flashing alternately	Turn on	Turn off	Turn on	Flashing	Flashing	Turn off	Flashing

Turn on Bluetooth	Prompt sound: Power on
Bluetooth connected	Prompt sound: Connected
Disconnect Bluetooth	Prompt sound: Disconnected
Turn off Bluetooth	Prompt sound: Power off
Standby	1. Turn on Bluetooth, if there is no connection for a long time, regardless of whether the adapter is plugged in or not, if there is no connection for 20 minutes, Bluetooth will automatically turn off 2. After connecting the device, the Bluetooth on status of the phone and the Bluetooth speaker will automatically connect within the valid range 3. After connecting to Bluetooth, if the distance is too far, Bluetooth will disconnect. When it reaches the receiving range (within 20 minutes), Bluetooth will automatically connect

Product Description

JJT-C09PLUS is an internationally leading and cost-effective five in one Bluetooth speaker wireless charging solution that achieves efficient wireless power transmission; Conversion efficiency up to 80%, maximum transmission distance up to 5mm, support Apple phone pop ups, support 5W/7.5W/10W/25W wireless charging, supporting PD protocol fast charging adapter, can charge all wireless charging phones that meet Qi standards. This product can charge phones, Apple earphones, and Apple watches simultaneously, and comes with Bluetooth speaker/night light/ambient light/clock/alarm function.

Precautions

- 1. It has Over-current protection (OCP), Short circuit protection (short), Over voltage and under-voltage protection (UVP) Foreign object Detection (FOD),no-load protection and other functions.
- 2. If Mobile phone/ Earbuds/ AirPods/ Apple Watch has a protective case, please confirm that protective case is Non-metallic and flat without protrusions, and thickness should not exceed 2mm.
- 3. Avoid direct sunlight, high temperature and other environments, and Stay away from fire and heat sources.
- 4. Store in a dry environment and avoid contact with corrosive Substances.
- 5. When children use the power supply, they should be guided by their Parents and operat according to the contents of the manual to ensure that it is correct use power.
- 6. Do not disassemble or put into the fire without permission to avoid explosion.

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Note: The Grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. such modifications could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. To maintain compliance with FCC's RF exposure guidelines, the distance must be at least 20 cm between the radiator and your body, and fully supported by the operating and installation configurations of the transmitter and its antenna(s).
