

## T42 12Antenna specification

|                                                                                     |                                                                                     |                      |
|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|----------------------|
|  |  | Version : V 1.00     |
| Unit: mm /                                                                          |                                                                                     | tolerance: +/- 0.025 |

|                   |                               |
|-------------------|-------------------------------|
| Name: PCB antenna | Frequency : 2450MHz +/- 50MHz |
| Model : T4212B    | Gain: 0dBi                    |
| Date : 2024-06-21 |                               |
