Magnetic Wireless Charger User Manual

Safety and Handling

WARNING: Failure to follow these safety instructions could result in fire, Electric shock,injury,or damage to the Wirless Charger or other property. Read all the safety information below before using the Wirless Charger.

Liquid Exposure

Keep the Wirless Charger away from sources of liquid, such as drinks, oils. Lotions,sinks,bathtubs,and shower stalls,Protect the Wirless Charger from Dampness,humidity,or wet weather,such as rainsnow.and fog.

Power

Provide power to the Wirless Charger using compatible Power adapters,or third-party power adapters that are campliant with Applicable country regulations and international and regjonal safety Standards,including the Standard for Safety of infarmation Technology Equipment(IEC 60950-1jand the Standard for Safety of Audio/Video, Information and Communication Technology Equipment (ICE 62368-1).Other Adapters may not meet applicable safety standards,and using them coild Pose a risk of death or injury.

Recommended Power Adapter Specifications
Frequency: 50 to 60 Hz,single phase
Line Voltage: 100 to 240 VAC
Output Voltage/Current: 5/3A,9V/2A
Minimum Power Output:20W
Output Port: USB-C

Don't use the Wirless Charger or the USB-C power adapter in wet locationssuch as near a sinkmbathtub,or shower stall ,and don't connect Or disconnect them with wet hands.Disconnect the Wirless Charger,its Cable and the power adapter if any of the following conditions exists: You Want to clean the Wirless Charger or the power adapter;the power cord or piug becomnes frayed or otherwise damaged; the Wirless Charger,its Cable,or the power adapter is exposed to rain,excessive moisture,or liquid; or the Wirless Charger,its cable, or the power adapter has been dropped, Damaged,or you suspect that service or repair is required.When you use the USB-C power adapter, make sure the cable is fully inserted into the power Adapter before you plug the adapter into a power outlet.

When using the Wirless Charger , remove metallic cases and avoid p;acing Metallic foreign objects on it (for example, keys, coins, batteries, or jewelry), as they may interfere with charging or become warm enough to cause

Discomfort or injury if your skin comes into contact with them. Don't place any item with an RFID tag(for example, a contactless credit card, passport, or access card) on the Wirless Charger, because the RFID tag could be damaged.

Prolonged Heat Exposure

The Wirless Charger and its cable comply with the applicable surface Temperature standards and limits defined by the International Standard for Safety of Information Technology Equipment(EC 60950-1) and the Standard for Safety of Audio/Video,Information and Communication Technology Equipment(ICE 62368-1).However, even within these limits, sustained Contact with warm surfaces for long periods of time may cause discomfort or injury, Use common sense to avoid situations where your skin is in Contact with the Wirless Charger, the power adapter, or devices on the Wirless Charger when it's operating or connected to a power source for long Periods of time. For example , don't sleep on the Wirless Charger, the power Adapter, or devices on the Wirless Charger, or place them under a blanket, Pillow, or your body, when it's connected to a power source. It's important to Keep the Wirless Charger and the power adapter in a well-ventilated area When in use or charging. Take special care if you have a physical condition That affects your ability to detect heat against the body.

Repairing

Don't attempt to repair the Wirless Charger yourself. Disassembling the Wirless Charger may damage it or cause injury to you. if the Wirless Charger is damaged or malfunctions, discontinue use and contact Authorized Service Provider.

Exposure to Radio Frequency Energy

The Wirless Charger contains magnets and radios that emit electromagnetic fields. These electromagnetic fields may interfere with medical devices, such as pacemakers and defibrillators Consult your physician and medical device Manufacturer for information specific to your medical device and whether you need to maintain a safe distance of separation between your medical device and the Wirless Charger. If you suspect the Wirless Charger is interfering With your medical device, stop using the Wirless Charger.

System Specifications

Input Voltage/Current: 5V/3A,9V/2A
Wireless Output Power: 15W/10W/7.5W/5W
Operating Temperature:0-35°C(32-95°F)

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different

from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 cmbetween the radiator and your body.

FCC ID: 2BB65-HYS07

IC Caution:

RSS-Gen Issue 5 "&" RSS-Gen numéro 5
- English:
This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s).
Operation is subject to the following two conditions:
(1) This device may not cause interference.
(2) This device must accept any interference, including interference that may cause undesired operation of the device.
Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
RF exposure statement:
The equipment complies with IC Radiation exposure limit set forth for uncontrolled environment. This equipment should be installed and operated with minimum distance 10cm between the radiator and your body.
- French:
Cet appareil contient des émetteurs / récepteurs exemptés de licence conformes aux RSS (RSS) d'Innovation, Sciences et Développement économique Canada.
Le fonctionnement est soumis aux deux conditions suivantes:
(1) Cet appareil ne doit pas causer d'interférences.
(2) Cet appareil doit accepter toutes les interférences, y compris celles susceptibles de provoquer un fonctionnement indésirable de l'appareil.Tout changement ou modification non expressément approuvé par la partie responsable de la conformité pourrait annuler l'autorité de l'utilisateur à utiliser l'équipement.
Déclaration d'exposition RF:
L'équipement est conforme à la limite d'exposition aux radiations de la IC établie pour un environnement non contrôlé. Cet équipement doit être installé et utilisé avec une distance minimale de 10 cm entre le radiateur et votre corps.
IC: 30993-HYS07
