FCC certification (United States)

this equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. these limits are designed to provide reasonable protection against harmful interference in a residential installation. this equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. however, there is no guarantee that interference will not occur in a particular installation. if this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- reorient or relocate the receiving antenna.
- increase the separation between the equipment and receiver.
- connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- consult the dealer or an experienced radio/ TV technician for help.

this device complies with part 15 of the FCC Rules. operation is subject to the following two conditions:

1. this device may not cause harmful interference, and
2. this device must accept any interference received, including interference that may cause undesired operation

any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

this equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. this device and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter

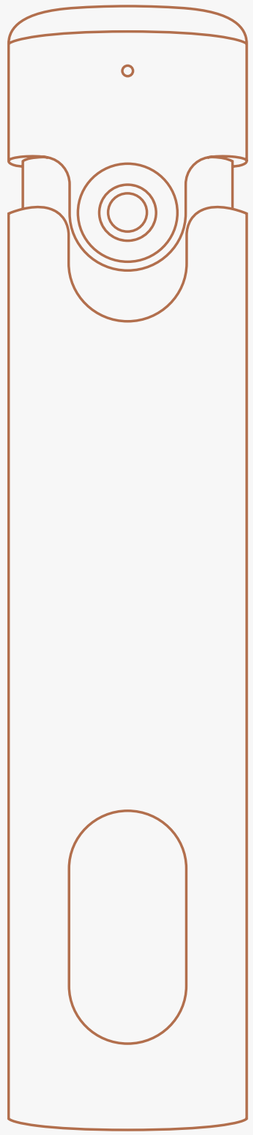
waste from electrical and electronic equipment

this appliance may not be treated as regular household waste. management of WEEE (waste electrical and electronic equipment) is applicable in the Member States of the European Union and other European countries with individual national policies on the management of WEEE. if you need more information on the collection, reuse and recycling systems, please contact your local or regional waste administration



pod manual

safety warning

- read and follow all instructions carefully
- avoid contact between the pod and water or other liquids
- clean only using a dry cloth
- keep out of reach of children under three, as small parts may pose choking hazard
- unplug the pod from charger during lightning storms or when unused for a long period of time. if your device requires professional repair please contact sofi via hello@sofi.health. servicing is required if the pod does not operate normally, has been dropped or damaged in any way, or been in contact with any liquids
- do not try to disassemble the pod yourself or replace the battery. any breach of manufacturer seals results in termination of warranty
- pod operating temperature: 0-30° C

your sofi pod contains a cr1632 rechargeable lithium battery, dispose of according to local regulations. designed and assembled in the uk

with over 374 million tonnes of electronic waste on Earth, and USB-C chargers as the dominant format in charging your smartphone, we didn't see the need to add yet one more cable. if you don't have one, please write to us and we will dispatch one to you
